TABLE OF CONTENTS

Chapter 1	General introduction and outline of this thesis	9
<hr/>		
Part 1	Sex differences in axial spondyloarthritis	
<hr/>		
Chapter 2	Sex and gender differences in axial spondyloarthritis: myths and truths	25
Chapter 3	Gender differences in retention rate of tumor necrosis factor alpha inhibitor treatment in ankylosing spondylitis: a retrospective cohort study in daily practice	45
Chapter 4	Disease activity in women with ankylosing spondylitis remains higher under Tumour Necrosis Factor inhibitor treatment than in men: a five-year observational study	59
Chapter 5	Long-term treatment with TNF-alpha inhibitors improves Bone Mineral Density but not vertebral fracture progression in Ankylosing Spondylitis	75
<hr/>		
Part 2	Early detection and treatment in axial spondyloarthritis	
<hr/>		
Chapter 6	Presence of active MRI lesions in patients suspected of non-radiographic axial spondyloarthritis with high disease activity and chance at conversion after a 6-month follow-up period	97
Chapter 7	Is treatment in patients suspected of non-radiographic Axial Spondyloarthritis effective? Six months results of a placebo-controlled trial	115
Chapter 8	Disease activity scores in non-radiographic axial spondyloarthritis	137
Chapter 9	Does a short course of etanercept influence disease progression and radiographic changes in patients suspected of nonradiographic axial spondyloarthritis? Three years follow up of a placebo-controlled trial	141
Chapter 10	Long-term effect of TNF inhibitors on radiographic progression in ankylosing spondylitis is associated with time-averaged CRP levels	157
Chapter 11	Summary	173
Chapter 12	General discussion	179
Appendices	Nederlandse samenvatting	190
	List of publications	194
	Curriculum Vitae	197
	Dankwoord	198
