CONTENTS

CHAPTER 1	General introduction	9
CHAPTER 2	A novel method to improve the osteogenesis capacity of hUCMSCs with dual-directional pre-induction under screened co-culture conditions	27
CHAPTER 3	Decellularized periosteum-derived hydrogels promote the proliferation, migration, and osteogenic differentiation of human umbilical cord mesenchymal stem cells	61
CHAPTER 4	Highly efficient biphasic calcium-phosphate coating procedure with an enhanced coating yield and protein incorporation rate	85
CHAPTER 5	3D printed TCP scaffolds functionalized with polydopamine-immobilized BMP2 to construct prefabricated biomimetic bone grafts	107
CHAPTER 6	Development and fabrication of co-axially electrospun biomimetic periosteum with a decellularized periosteal ECM shell/PCL core structure to promote the repair of critical-sized bone defects	129
CHAPTER 7	General discussion	175
CHAPTER 8	General summary	195
APPENDICES	Contributing authors	199
	Acknowledgments	203
	Curriculum vitae	207
