TABLE OF CONTENTS

INTRODUCTION	11
CHAPTER 1: General introduction	13
Background	14
The regulation of fetal and postnatal growth and body composition	14
Aims and objectives	16
Study design	17
Thesis outline	20
References	21
PART I. THE ROLE OF NUTRITION AND IGF-I ON GROWTH, BODY COMPOSITION AND HEALTH OUTCOMES IN PRETERM INFANTS IN INFANCY	25
CHAPTER 2: Dietary proteins and IGF I levels in preterm infants: determinants of growth, body composition and neurodevelopment	27
Abstract	28
Introduction	29
IGF I regulation	30
The role of IGF I in growth and body composition	30
The role of IGF I in neurodevelopment	34
The role of dietary proteins in growth and body composition	35
The role of dietary proteins in neurodevelopment	37
IGF I and dietary proteins	38
Conclusions	39
References	40
CHAPTER 3: Associations between bronchopulmonary dysplasia, Insulin-like growth factor I and nutrition	47
Abstract	48
Introduction	49
Methods	49
Results	51
Discussion	56
Conclusions	58
References	59
Supplemental material	61

CHAPTER 4: The course of IGF-1 levels and nutrient intake in extremely and very preterm infants during hospitalisation	69
Abstract	70
Introduction	71
Methods	72
Results	75
Discussion	83
Conclusions	85
References	86
PART II. THE DETERMINANTS OF BODY COMPOSITION AND METHODS TO ASSESS BODY COMPOSITION IN PRETERM INFANTS	89
CHAPTER 5: IGF-I, growth and body composition in preterm infants up to term equivalent age	91
Abstract	92
Introduction	93
Methods	93
Results	96
Discussion	108
Conclusions	111
References	112
CHAPTER 6: A comparative study using Dual-energy X-ray absorptiometry, air displacement plethysmography and skinfolds to assess fat mass in preterms at term-equivalent age	115
Abstract	116
Introduction	117
Methods	118
Results	120
Discussion	126
References	128

CHAPTER 7: Body composition in preterm infants: a systematic review on measurement methods	131
Abstract	132
Introduction	133
Methods	133
Results	137
Discussion	156
Conclusions	161
References	163
DISCUSSION & SUMMARY	169
CHAPTER 8: General discussion	171
Nutrition in relation to the endocrine regulation of preterm growth and body composition	172
The developing endocrine axis in relation to comorbidities in preterm infants	174
Determinants and assessment of body composition in preterm infants	175
Future research directions	176
References	178
CHAPTER 9: Summary	183
Part I. IGF-I and nutrition in relation to growth, body composition and health outcomes in preterm infants	184
Part II. Determinants and assessment of body composition in preterm infants	184
APPENDIX	187
CHAPTER 10: PhD portfolio	189
CHAPTER 11: Acknowledgements	195
