Contents

Publications by the author	v
1 General introduction	1
2 Continuous ambulatory hand force monitoring during manual materials handling using instrumented force shoes and an inertial motion capture suit.	15
3 Estimating the L5-S1 flexion/extension moment in symmetrical lifting using a simplified ambulatory measurement system.	33
4 Effects of a passive exoskeleton on the mechanical loading of the low-back in static holding tasks.	51
5 Effects of a passive back exoskeleton on the mechanical loading of the low-back during symmetric lifting.	69
6 Passive back support exoskeleton improves range of motion using flexible beams.	85
7 Biomechanical evaluation of a new passive back support exoskeleton.	119
8 Rationale, implementation and evaluation of assistive strategies for an active back-support exoskeleton.	137
9 The effect of control strategies for an active back-support exoskeleton on spine loading and kinematics during lifting.	163
10 General Discussion	181
References	201
Samenvatting	219
Dankwoord	223
