1 Introduction

1.1 On Sustainability ........................................... 2
1.2 On Green ICT ............................................... 4
  1.2.1 Definition of green ICT ............................... 5
  1.2.2 The environmental impact of ICT ................... 7
1.3 Thesis Goal .................................................. 10
1.4 Relevancy of Thesis ....................................... 12
1.5 Research Questions ....................................... 13
1.6 Outline of the Thesis and Publications ................ 14

2 Green ICT Research Challenges 19

2.1 Introduction ............................................... 19
2.2 Methodology ............................................... 20
2.3 Results .................................................... 22
2.4 Discussion ................................................ 25
  2.4.1 Conflicting trends ..................................... 25
  2.4.2 People awareness strategy effects .................. 26
  2.4.3 Research direction and research gaps ............... 27
2.5 Conclusion ............................................... 28

3 Factors of Influence on the Environmental Impact of ICT 29

3.1 Introduction ............................................... 29
3.2 Design of the Literature Review .......................... 31
  3.2.1 Chapter research questions ........................... 31
  3.2.2 Search process ........................................ 31
  3.2.3 Study selection ....................................... 32
  3.2.4 Data analysis ......................................... 32
3.3 Results .................................................... 35
  3.3.1 Factors of influence found ........................... 35
  3.3.2 Classification of factors of influence ............... 36
  3.3.3 Taxonomy of factors of influence ................... 37
  3.3.4 Description of taxonomy and the factors of influence 38
  3.3.5 Comparison between taxonomy and conceptual framework . 41
  3.3.6 Coverage and spread of domains and factors ....... 42
3.4 Discussion ................................................ 43
  3.4.1 Factors found ......................................... 43
  3.4.2 On the taxonomy ...................................... 45
  3.4.3 Gaps in the taxonomy ................................ 47
  3.4.4 State of the art of the research field ............... 48
7 Conclusions

7.1 Main Contributions ........................................... 113
7.1.1 RQ1.1. How is the potential of green ICT reflected in research? ............. 113
7.1.2 RQ1.2. What are the factors of influence on the environmental impact of ICT? ........................................... 114
7.1.3 RQ2. How can the potential of green ICT be modelled for organisations? ........................................... 115
7.1.4 RQ3. How is the quality of the SGIMM assessed by its potential users? ......... 116
7.1.5 RQ4. How does the SGIMM function in practice? .......................... 116
7.1.6 RQ5. What factors of influence affect the adoption of green ICT practices? ........................................... 117
7.1.7 The main research question: How can organisations make use of the potential of green ICT? ........................................... 118

7.2 Future Directions ........................................... 119
7.2.1 The human factor ........................................... 119
7.2.2 Cycle of factors of influence ........................................... 119
7.2.3 A tool with a systemic approach ........................................... 120

7.3 Final Thoughts ........................................... 120

Summary ........................................... 123

Samenvatting ........................................... 127

Acknowledgements ........................................... 131

Bibliography ........................................... 158

A Overview of Kinds of Effect of ICT on the Environment ........................................... 159

B Community on Green ICT in Dutch Higher Education ........................................... 167

C The SURF Green ICT Maturity Model in detail ........................................... 175

D Primary Studies in SLR on Green ICT Research Challenges ........................................... 185
