Acknowledgement	1
CHAPTER 1 Introduction	5
1.1. Background	5
1.2. Indonesia.....	8
1.3. Setup of the Thesis	11
CHAPTER 2 What Drives the Environmental Kuznets Curve for CO₂ Emissions? A Meta-Analysis	19
2.1. Introduction	19
2.2. Meta-Analysis and Its Application to EKC Studies	21
2.3. Methodology and Data	27
2.3.1. Methodology.....	27
2.3.2. Data	33
2.4. Results and Discussion	37
2.5. Conclusion	48
CHAPTER 3 Cultural Drivers of Income–Emission Relationships across Asian Economies	51
3.1. Introduction	51
3.2. IER: The Role of Population, Income and Technology.....	54
3.3. IER: The Role of Cultural Values	56
3.4. Data and Methodology	60
3.4.1. Data	60
3.4.2. Methodology.....	62
3.5. Results: The IER in Asia	64
3.6. Results: The Role of Culture.....	71
3.7. Conclusion	78
APPENDIX	81

CHAPTER 4 Population Growth and the Trade-off between Green and Brown Expansion of Electricity Supply in Developing Countries. A Spatial Model and Evidence for Indonesia.....	85
4.1. Introduction	85
4.2. The Model.....	88
4.2.1. Introduction.....	88
4.2.2. Geography of Electricity Production.....	90
4.2.3. Electricity Market	90
4.2.4. Non-Renewable Resource Production.....	92
4.2.5. Wholesale Electricity Production.....	94
4.2.6. Transmission of Electrical Power.....	99
4.3. Model Equilibrium.....	101
4.4. Model Calibration and Simulations.....	105
4.4.1. The Electricity System in Indonesia	105
4.4.2. Model Calibration	107
4.5. Simulation Results.....	109
4.6. Conclusions.....	114
APPENDIX	117
CHAPTER 5 The Impact of City Size and Population Density on Residential Energy Use in Indonesian Cities	123
5.1. Introduction	123
5.2. Literature	125
5.3. Data and Summary Statistics.....	130
5.4. Regression Analysis – Cities in Indonesia	142
5.5. Regression Analysis – Districts in Yogyakarta.....	152
5.6. Discussion and Conclusion.....	157
APPENDIX 5.A – Demographic Characteristics.....	160
APPENDIX 5.B – Scatter Plots for Education and Urbanization versus Energy and for Income versus Urban Area Characteristics.....	163
APPENDIX 5.C – Questionnaire of the Survey Conducted in Yogyakarta Province .	165

CHAPTER 6 Does Urban Form Affect Transport Mode Choice? Evidence from Yogyakarta, Indonesia	171
6.1. Introduction	171
6.2. Literature Review	174
6.2.1. Modal Choice	175
6.2.2. Travel Characteristics	176
6.2.3. Urban Forms.....	177
6.3. Regression Methodology.....	179
6.4. Data and Descriptive Statistics	181
6.5. Regression Results	192
6.5.1. Transport Mode Choice.....	193
6.5.2. Ownership of Motorcycles and Cars.....	201
6.6. Conclusions	208
APPENDIX 6.A – Tables of Household Characteristics from Other Sources and Correlations among Variables in This Study	212
APPENDIX 6.B – The Role of Personal and Household Characteristics.....	215
CHAPTER 7 Conclusions	221
7.1. On the Income-Emission Relationship	221
7.2. On the Role of Urbanization.....	225
REFERENCES	233
SUMMARY	257

List of Tables

Table 1.1 – Previous IER Studies on Indonesia.....	13
Table 2.1 – Differences from Previous Studies.....	25
Table 2.2 – Dependent Variables.....	30
Table 2.3 – Summary of Relevant Turning Points in the Range of GDP per Capita.....	32
Table 2.4 – Explanatory Variables.....	34
Table 2.5 – Results of the OLR Model and Comparison with Previous Studies.....	38
Table 2.6 – Results of the OLS Models and Comparison with Previous Studies for TP _{max}	43
Table 2.7 – Fraction of Positive Slopes at Predetermined Values of GDP per Capita (2000 US\$).....	48
Table 3.1 – Summary Statistics.....	61
Table 3.2 – Comparison of Some Indicators of the Important Asian Countries in 2014	62
Table 3.3 – Results of the Mixed-Effect Model with per Capita CO ₂ Emissions as the Dependent Variable (Basic Model).....	65
Table 3.4 – Results of the Mixed-Effect Model with per Capita CO ₂ Emissions Corrected for the Income Effect as the Dependent Variable (Basic Model).....	66
Table 3.5 – Results of the Mixed-Effects Model with per Capita CO ₂ Emissions as the Dependent Variable (Extended Model).....	72
Table 3.6 – Results of the Mixed-Effects Model with per Capita CO ₂ Emissions Corrected for the Income Effect as the Dependent Variable (Extended Model)	73
Table 3.7 – Results of the Mixed-Effect Model with CO ₂ per Unit GDP (Constant 2010 US\$) as the Dependent Variable (Basic Model).....	81
Table 3.8 – Results of the Mixed-Effect Model with per Capita CO ₂ Emissions as the Dependent Variable (Extended Model).....	83

Table 4.1 – List of Parameter Values in the Base Simulation	117
Table 4.2 – The Result of the Base Simulation to Obtain W_B^e and W_G^e that Maximize Π_T^e	120
Table 4.3 – Comparison of the Basic Simulation Result with Real Data.....	121
Table 5.1 – Demographic Characteristics of Our Samples: Cities in Indonesia and Districts in the Yogyakarta Metropolitan Area.....	131
Table 5.2 – Number of Households and Sample Size of the Yogyakarta Survey	133
Table 5.3 – Correlation and Summary Statistics across Cities in Indonesia.....	136
Table 5.4 – Correlation and Summary Statistics across Households in Yogyakarta Province.....	137
Table 5.5 – OLS Regression Explaining the Energy Expenditure, Cross-City Analysis for Indonesia.....	148
Table 5.6 – OLS Regression Explaining Income across Cities in Indonesia	150
Table 5.7 – 2SLS Regression Explaining Energy Expenditure, Cross-City Analysis for Indonesia.....	151
Table 5.8 – OLS Regression Explaining Energy Consumption, Cross-Household Analysis for Yogyakarta Province.....	153
Table 5.9 – OLS Regression Explaining Energy Consumption Residuals across Households in Yogyakarta Province.....	154
Table 5.10 – Demographic Characteristics of Cities in Indonesia.....	160
Table 5.11 – Demographic Characteristics of Districts in Yogyakarta Province.....	162
Table 6.1 – Motorcycle Statistics for Asian Countries	172
Table 6.2 – Population (Density), GRDP and Private Motor Vehicles across Java Island in 2016.....	173
Table 6.3 – Demography and Economics in DIY Province in 2015	183
Table 6.4 – Summary Statistics	187
Table 6.5 – Average Travel Distance and Energy Consumption by Transport Mode	191
Table 6.6 – Travel Distance by Transport Mode from Previous Studies.....	192
Table 6.7 – RRR of the MNL Regression for Commuting Activity	193
Table 6.8 – RRR of the MNL Regression for Leisure Activity.....	194
Table 6.9 – Marginal Effect of the MNL Regression for Commuting Act	195

Table 6.10 – Marginal Effect of the MNL Regression for Leisure Activity	196
Table 6.11 – Odds Ratio of the OLR on Motorcycle Ownership.....	201
Table 6.12 – Odds Ratio of the OLR on Car Ownership.....	202
Table 6.13 – Marginal Effect of the OLR on Motorcycle Ownership	203
Table 6.14 – Marginal Effect of the OLR on Car Ownership	205
Table 6.15 – Comparison of Statistics from the Survey and Other Sources.....	212
Table 6.16 – Correlation among Variables for Commuting Activity	213
Table 6.17 – Correlation among Variables for Leisure Activity.....	214

List of Figures

Figure 1.1 – The Interplay between Development, Space and the Environment	6
Figure 1.2 – The Dynamics of Indonesia, 1980–2017	9
Figure 1.3 – Share of Indonesia in World, 1980–2017.....	9
Figure 1.4 – Indonesian Dynamics in Global Perspective, 1980–2017	10
Figure 1.5 – Indonesian Electricity Production by Source, 1980–2015.....	11
Figure 1.6 – Concentration of People in Low and Lower-Middle Income Countries, in Relation to Electricity Access and Consumption (Top) as well as Electricity Production from Non-Renewable and Renewable Sources (Bottom).....	17
Figure 2.1 – The Environmental Kuznets Curve (EKC) and Alternative Hypotheses	20
Figure 2.2 – Histogram with a Normal Curve (above) and a Curve of Cumulative Distribution (below) of the Turning Points within the GDP per Capita Range	32
Figure 3.1 – Share of the Emerging Asian Countries for Some Indicators in 2014.....	61
Figure 3.2 – Curve Estimation of per Capita CO ₂ Emissions in 2014.....	67
Figure 3.3 – Curve Estimation of per Capita CO ₂ Emissions Corrected for Income in 2014	67
Figure 3.4 – Curve Estimation of CO ₂ Emissions per GDP in 2014.....	82
Figure 4.1 – Illustration of a Small Open Economy and Exploitation Zone of Non- Renewable Resources	90
Figure 4.2 – The Electricity Demand under the Influence of Changing Population Density (D)	110
Figure 4.3 – The Share of Green Electricity under the Influence of Changing Population Density (D) (Top-Left) and the Elasticity of the Electricity Demand with Respect to the Population Density (β_W) (Top-Right & Bottom).....	110
Figure 4.4 – The Share of Green Electricity under the Influence of Changing Population Density (D) and Green Power Density (α_G) (Left) versus the Price Elasticity of the Green Exploitation Area (β_L) (Right).....	112
Figure 4.5 – The Share of Green Electricity under the Influence of Changing Population Density (D) and Total Carry Cost (u_B).....	113

Figure 4.6 – The Share of Green Electricity under the Influence of Changing Population Density (D) and Promoting Green Technology.....	113
Figure 4.7 – The Production of Green Electricity under the Influence of Changing Population Density (D) (Left) versus Elasticity of the Electricity Demand with Respect to the Population Density (β_w) (Right).....	121
Figure 5.1 – Map of Indonesia and Yogyakarta Province.....	132
Figure 5.2 – Scatter Plots between Energy Expenditure and Population Density and Population across Cities in Indonesia.....	139
Figure 5.3 – Scatter Plots between Energy Consumption and Population Density, Distance between the Home and the City Centre and Population across Districts in Yogyakarta Province.....	140
Figure 5.4 – Scatter Plots between the Distance between the Home and the City Centre and the Population Density, Education, Income, House Rental Price and Commuting Distance across Districts in Yogyakarta Province.....	141
Figure 5.5 – Scatter Plots between Energy Use and Income.....	141
Figure 5.6 – Plot Showing Energy Use versus Education.....	163
Figure 5.7 – Plot Showing Energy Use versus Urbanization.....	163
Figure 5.8 – Characteristics between Income and Education, Population Density and Population (Top) and Distance between the Home and the City Centre (Bottom).....	164
Figure 6.1 – Map of Indonesia and Yogyakarta Province.....	182
Figure 6.2 – Cross-District Correlations between the Distance to the CBD and the Traveller’s Characteristics.....	189
Figure 6.3 – Scatter Plots of the Correlation between Density and Travellers’ Characteristics.....	190
Figure 6.4 – Scatter Plots of the Correlation between Income and Travellers’ Characteristics.....	191
