Contents

Preface	xi
Chapter 1: Introduction	1
1.1. Geospatial information for environmental problems	1
1.2. A framework and requirements for a multi-disciplinary decision making process.....	2
1.3. Efficient Data-Model-Technology integration towards an optimized spatial decision support system.....	6
1.4. Thesis outline: Research objectives and applied methodologies	8
1.4.1. Local impact of tree volume on nocturnal urban heat island: A case study in Amsterdam	9
1.4.2. Developing a wind turbine planning platform: Integration of “sound propagation model–GIS-game engine” triplet	10
1.4.3. Interactive 3D geodesign tool for multidisciplinary wind turbine planning.....	11
1.4.4. Analyzing the impact of spatial context on the heat consumption of individual households..	13
1.4.5. From BIM to geo-analysis: view coverage and shadow analysis by BIM/GIS integration.....	14
Chapter 2: Local impact of tree volume on nocturnal urban heat island: A case study in Amsterdam	16
2. 1. Introduction	16
2.1.1. Relevant Studies	17
2.1.2. Research objectives	18
2.2. Methodology	18
2.2.1. Study area	18
2.2.2. UHI analysis	19
2.2.3. Urbanization degree	20
2.2.4. SVF estimation.....	21
2.2.5. Tree Volume.....	22
2.3. Results	24
2.4. Discussion and Conclusion	38
Chapter 3: Developing a Wind Turbine Planning Platform: Integration of “Sound Propagation Model–GIS-Game Engine” Triplet	40
3.1. Introduction	40
3.1.1. Wind energy : benefits and externalities	40
3.1.2. Incorporation of an information system into a 3D virtual environment to facilitate discussion	41
3.1.3. Game engine-based virtual environment for planning processes	41

3.1.4. Actual objects in the virtual environment: GIS integration.....	42
3.1.5. Environmental information integration through “Sound propagation-GIS-Game engine” incorporation	42
3.2. Methodology	43
3.2.1. System architecture	43
3.2.2. Wind turbine noise	45
3.2.2.1. Noise generation.....	45
3.2.2.2. Noise propagation.....	46
3.2.2.2.1. Ray tracing model.....	46
3.2.2.2.2. Geometrical spreading and reflection.....	47
3.2.2.2.3. Absorption	49
3.2.2.2.4. Diffraction	49
3.2.2.2.5. Refraction	50
3.3. Framework Implementation	52
3.3.1. Noise generation.....	54
3.3.2. Geometrical spreading.....	54
3.3.3. Diffraction	55
3.3.4. Ground interaction.....	56
3.3.5. Effect of vegetation	57
3.3.6. Effect of atmospheric absorption.....	58
3.3.7. Effect of wind.....	60
3.4. Results	60
3.4.1. Test cases.....	62
3.4.1.1. Test Case 1	62
3.4.1.2. Test Case 2	64
3.4.1.3. Test Case 3	66
3.4.1.4. Test Case 4	67
3.5. Conclusion.....	69
Chapter 4: Interactive 3D Geodesign Tool for Multidisciplinary Wind Turbine Planning	72
4.1. Introduction	72
4.2. Methodology: Geodesign-based System Architecture.....	74
4.2.1. Representation models	74
4.2.2. Process models	77
4.2.3. Evaluation models	79
4.2.4. Change models	80

4.2.5. Impact models	82
4.2.5.1. Power Generation	85
4.2.5.2. Noise.....	86
4.2.5.3. Shadow	89
4.2.5.3.1. Instantaneous shadow	89
4.2.5.3.2. Average shadow	90
4.2.5.4. Visibility.....	91
4.2.5.5. Wake area.....	92
4.2.6. Decision models	94
4.3. Results and discussion.....	95
4.3.1. Multi-criteria analysis.....	95
4.3.1.1. Scoring.....	96
4.3.2. International context.....	99
4.4. Conclusions	100
Chapter 5: Analysing the impact of spatial context on the heat consumption of individual households.....	102
5.1. Introduction	102
5.1.1. The factors influencing household heat consumption	103
5.1.2. Spatial context and heat demand	104
5.1.3. Applying GIS in household heat demand analysis.....	105
5.2. Methodology.....	106
5.2.1. Regression analysis	106
5.2.2. Defining building shape and surroundings.....	107
5.2.2.1. Data.....	108
5.2.2.2. Models	108
5.3. Results and discussion.....	112
5.4. Conclusions	120
Chapter 6: From BIM to geo-analysis: view coverage and shadow analysis by BIM/GIS integration.....	122
6.1. Introduction	122
6.2. Methodology	123
6.2.1. View analysis	124
6.2.2. Shadow analysis	124
6.3. Results	124
6.3.1. Quality of view analysis	125

6.3.2. Shadow volume analysis	126
6.4. Discussions and conclusions	127
Chapter 7: Synthesis and conclusions	128
7.1. Geodesign framework for a multi-disciplinary decision making process	128
7.1.1. Representation models	129
7.1.2. Process models	129
7.1.3. Change models	131
7.1.4. Impact models	131
7.2. Answers to the research questions.....	132
7.3. Considerations and future perspectives.....	136
Summary	140
Samenvatting.....	145
References	151
