Acknowledgments

Here I would like to spend a few words to acknowledge all those who contributed to this thesis through their support, assistance, and love.

I have to start by thanking my supervisor, Roberta Croce. I am very grateful you offered me the chance to be a PhD student in your group even though I was lacking any laboratory experience at the time. You have always been very supportive and available for discussion, and provided a great balance of guidance and freedom. I could not be more accomplished of what I could investigate with you using so many different approaches, techniques, and samples.

None of this work would have been possible without my colleague and friend, Niki. You introduced me to the experimental world and taught me how to use nearly all spectroscopy setups I have been working with these four years. Not least, you were the first friend I made when I moved to Amsterdam and, since then, you have been a point of reference for me every day.

I would not be the scientist and person I am today without you, Luca. Since you joined our group, you shared with me your knowledge about the amazing world of cyanobacteria and awakened my interest for biology. Also, I am not exaggerating when I say that all the funniest moments I had here in Amsterdam were with you. Your friendship and joy made me grow all round.

I am also grateful to my colleague and friend, Martijn. Being neighbors at the time of a world pandemic and sharing the condition of ‘senior’ PhD students has been of great support for me this last year.

I would like to offer my special thanks to each member of my research group: Bart v O., Lijin, Olga, Alberto, Pengqi, Lauren, Judith, Bart S., Tom, Chen, Wojciech, Xin, Henny, Pavel, Alfred, Eduard, Avra, Vincent, Ivo, John, Raoul, etc., for all the help, insightful discussions, collaborations, and fun moments we shared throughout these years.

I also appreciate the positive interactions and fruitful collaborations with Vladimir Novoderezhkin, Leonas Valkunas, Jevgenij Chmeliov, Andrius Gelzinis, Don Bryant, Chris Gisriel, Gaozhong Shen, Ming-Yang Ho, Herbert van Amerongen, Ahmad Bhatti, Benedetta Mennucci, and Lorenzo Cupellini. I have learned a lot from all of you.

Many thanks to all professors and PhD students of the SE2B network. I truly appreciated being part of this amazing experience, which gave me the opportunity to travel all around Europe, meet a lot of interesting people with different backgrounds, and learn about science and society. I will always remember the great time we had at our final meeting in Porto! My special thanks to Claudio for all the insightful discussions and your company at many conferences.

Last but not least, I am eternally grateful to my family.

Simone, these four years at long distance have been very challenging, but we managed to pull it through! You have always been there for me (including the times you helped me with your graphical designing skills), and gave me the boost to stand up in the most difficult moments. My best time in the Netherlands was certainly when you came here for your six-month internship, and I hope our life together will be at least as happy as those months!

Ai miei genitori. Questi anni di separazione e difficoltà mi hanno fatto davvero capire quanto siete importanti per me e quanto bene vi voglia. Vi sono eternamente grato per tutti i sacrifici fatti per me fin da quando ero piccolo, e per tutto ciò che fate ancora ogni volta ne abbia bisogno, nonostante la distanza. Senza i vostri consigli, la vostra capacità di risolvere prontamente le situazioni più complicate, e i pacchi pieni di cose buonissime che mi avete spedito assiduamente in questi anni, non ce l'avrei mai fatta. Grazie di cuore!
