Table of contents

1	Introduction	1
2	Stimulated Raman scattering; theory and experimental setup design	11
3	Fast microplastics identification with stimulated Raman scattering microscopy	29
4	Silicone detection in breast tissue with stimulated Raman scattering: method and clinical study	51
4A	Label-free Stimulated Raman Scattering imaging reveals silicone breast implant material in tissue	52
4B	Baker IV capsular contracture is correlated with an increased amount of silicone material: an intra-patient study	67
5	Stimulated Raman scattering microscopy with long wavelengths for improved imaging depth	81
6	Stimulated Raman scattering simulation for imaging optimization	97
7	Discussion and conclusion	129
