Acknowledgements

This dissertation is the result of several years hard work, that was made possible by the support of many others to whom I am very grateful. First, thanks to my two advisors. Mark, thanks for hiring me in the first place, for introducing me to a new field in Psychology, and for improving my writing. Thomas, thanks for sharing your impressive knowledge, your supervision has forced me (admittedly sometimes reluctantly) to learn so much more about statistics than I ever thought I would during my PhD. I would also like to thank my former colleagues in Amsterdam at the VU. My time as a PhD student was made a lot more fun with the help of some poker nights and late night dancing, among other things. The social and international atmosphere at the old S&O psychology department is something I will remember fondly. Then, my “new” colleagues at Leiden have been wonderful company for the last 1.5 years, thank you for welcoming me into your department. I will be sad to leave you all. A special mention also goes to all the thesis students who have helped me collect data for this dissertation over the past few years.

Charlotte and Lotte, I am very happy to have you standing next to me during my defense, and grateful that we found each other all those years ago. I can't mention the Charlottes without including the rest of my “Middelburg group”. Dear Brigitte, Mischa, Martijn, and Puck, if it were up to me I would also have you all by my side during my PhD defense. Though many of us don't even live on the same continent anymore, you will always be my favourite people. You have inspired me so much over the last 10 years. Whenever I feel convinced that I can't accomplish something (such as writing this dissertation), I look at everything you have done and I feel like I can take on the world. Bedankt voor jullie vriendschap, jullie zijn mijn voorbeelden.

Brian, thank you for being both my partner in life and in science. You have helped me find the confidence I needed to go for a career as an academic. I can't wait to go on our next adventure. Finally, thank you to my family, who have consistently provided me with the support I needed to make this happen.
