Table of Contents

Introduction	1
Chapter 1: Detrended fluctuation analysis: A scale-free view on neuronal oscillations	5
Abstract	6
Introduction.....	6
Fundamental concepts required to understand DFA.....	7
The detrended fluctuation analysis (DFA).....	20
DFA applied to neuronal oscillations.....	23
Try it yourself using the Neurophysiological Biomarker Toolbox	25
Insights from the application of DFA to neuronal oscillations	27
DFA as a biomarker of neurophysiological disorder	31
Outlook	32
Acknowledgements	33
Chapter 2: Critical-state dynamics of avalanches and oscillations jointly emerge from balanced excitation/inhibition in neuronal networks	35
Abstract	36
Introduction.....	36
Materials and Methods	39
Results	42
Discussion	48
Acknowledgements	52
Chapter 3: Versatility of neuronal network function is maximized in the critical state	53
Abstract	54
Introduction.....	54

Results	56
Discussion	64
Methods	66
Acknowledgements	71
Chapter 4: Cortical excitation-inhibition ratio explains individual variation in perceptual processing	73
Abstract	74
Introduction.....	74
Results	77
Discussion	84
Methods	86
Acknowledgements	96
Discussion	97
Critical-state dynamics of neuronal oscillations.....	98
Integrating different measures of neuronal activity	99
Functions of critical-state dynamics	99
E/I and its future applications	101
Critical oscillations and learning	102
Conclusion	102
References	103
Summary	117
Samenvatting	119
Publications	123
Publications not included in thesis:.....	123
Curriculum Vitae	125
Acknowledgements	127
