Contents

General abstract	9
List of abbreviations	10
Chapter 1. General introduction	13
List of figures	14
1. The developing nervous system	15
2. Mitochondria	16
2.1 Mitochondrial ATP production	17
2.2 Mitochondrial calcium buffering	17
2.3 Mitochondrial fusion and fission	18
2.4 Mitochondrial motility	19
2.5 Mitochondrial stabilization	20
3. Mitochondria in neurite and synapse development	21
4. Mitochondria and neuronal activity	22
4.1 Global activity	22
4.2 Local (synaptic) activity	23
5. Summary	24
6. Thesis outline	25
References	27

Chapter 2. Mitochondrial dynamics in adult visual cortex are limited and not affected by axonal structural plasticity	33
List of figures	34
Abstract	35
Introduction	35
Results and Discussion	36
Materials and Methods	43
Author contributions	48
Affiliations	48
Competing interests	48
Acknowledgements	49
References	49
Chapter 3. Activity-dependent regulation of mitochondrial motility in developing cortical dendrites	55
List of figures	56
Abstract	57
Introduction	57
Results	59
Discussion	70
Materials and Methods	73
Author contributions	77
Affiliations	78
Competing interests	78
Acknowledgements	78
References	78

Chapter 4. The relationship between calcium transients and mitochondrial distribution in developing cortical dendrites	85
List of figures	86
Abstract	87
Introduction	87
Results	88
Discussion	94
Materials and Methods	98
Author contributions	100
Affiliations	101
Competing interests	101
Acknowledgements	101
References	101
Chapter 5. Characterization of the EB3-YFP/ Mito-CFP mouse line as a tool to study microtubule- and mitochondrial dynamics in the developing visual cortex	105
List of figures	106
Abstract	107
Introduction	107
Results	109
Discussion	113
Materials and Methods	115
Author contributions	117
Affiliations	117
Competing interests	117
Acknowledgements	117

References	117
Chapter 6. General discussion	121
Preface	122
Conclusions	122
1. Mitochondrial motility decreases over development	122
2. Global neuronal activity does not affect mitochondrial motility	124
3. Synaptic activity arrests mitochondrial motility	125
Open questions	127
1. Are mitochondria closer to synapses than expected by chance?	127
2. What is the relationship between microtubule- and mitochondrial dynamics?	128
Relevance	128
Mitochondria in dendrite and synapse development	128
Global and local activity have different characteristics	129
Experimental approaches and manipulations within the scope of this thesis	130
Future directions	131
References	133
