Table of Contents

Chapter 1.....	10
Introduction.....	10
1.1 Warming of the Arctic	11
1.2 Permafrost distribution and different types of thaw.....	11
1.3 Estimates on greenhouse gas emissions from permafrost thaw	13
1.4 Fluvial systems integrate landscape signals and transport organic carbon	14
1.5 Research objectives.....	15
1.6 Thesis outline.....	16
Chapter 2.....	17
Downstream evolution of particulate organic matter composition from permafrost thaw slumps	17
1. Introduction.....	18
2. Materials and methods	19
2.1 Study area.....	19
2.2 Sampling	22
2.3 Stable water isotopes.....	23
2.4 Mineral-specific surface area analysis	23
2.5 Grain size analysis	24
2.6 Total suspended solids, bulk organic carbon and carbon isotope ($\delta^{13}\text{C}$, $\Delta^{14}\text{C}$) analyses	24
2.7 Pyrolysis-gas chromatography-mass spectrometry (py-GCMS)	26
2.8 Biomarkers: <i>n</i> -alkanes and <i>n</i> -alkanoic acids.....	26
3. Results.....	28
3.1 Stable water isotopes.....	28
3.2 Total suspended solids, mineral-specific surface area and grain size	28
3.3 Organic carbon and total nitrogen concentrations and organic carbon loadings	30
3.4 Carbon isotopes ($\delta^{13}\text{C}$, $\Delta^{14}\text{C}$).....	32
3.5 (Macro)molecular composition of SPM and streambank sediments	34
4. Discussion.....	36
4.1 Within the slump: RTS features as sources of water and organic matter	36
4.2 Beyond the thaw slump: Transport and degradation status of sediments and SPM	42
4.3 The role of RTS features on the Peel Plateau organic carbon dynamics	48
5. Conclusions.....	49
Chapter 3.....	51
Seasonal variability in particulate organic carbon degradation in the Kolyma River, Siberia	51
1. Introduction.....	52
2. Materials and methods	53
2.1 Study area and field sampling.....	53

2.2 Incubation experiments	53
2.3 Degradation losses, rates and half-life	54
2.4 Source apportionment and statistical analysis.....	55
3. Results.....	56
3.1 Initial river conditions during freshet and summer	56
3.2 Changes in organic carbon concentrations and isotopic values during incubation.....	59
3.3 Source apportionment of particulate organic carbon before and after incubation	61
4. Discussion.....	61
4.1 Seasonal variability in river OC composition and source	61
4.2 Seasonal variability in OC losses during whole-water incubations	64
4.3 Particles change DOC dynamics.....	70
5. Conclusions.....	73
Chapter 4.....	74
Seasonal carbon dynamics of the Kolyma River tributaries, Siberia.....	74
1. Introduction.....	75
2. Materials and Methods.....	75
2.1 Study area and background.....	75
2.2 Field sampling.....	76
2.3 Spatial analysis and landscape characterization.....	78
2.4 Source apportionment and statistical analysis.....	78
3. Results.....	78
3.1 Catchment characteristics and water chemistry	78
3.2 Total suspended solids, carbon concentrations and isotopes of carbon	79
3.3 Source apportionment	81
4. Discussion.....	83
4.1 Smaller tributary streams may start primary production earlier than larger rivers in the spring	83
4.2 Organic and inorganic carbon dynamics differ between the tributaries and the Kolyma River	83
4.3 The importance of autochthonous production: riverine POC dominates in the tributaries.....	87
5. Conclusions and implications	89
Chapter 5.....	90
Synthesis and Outlook	90
5.1 Abrupt permafrost thaw on the Peel Plateau.....	91
5.2 Complexities of particulate organic carbon degradation	92
5.3 Variability in the Arctic fluvial systems	94
5.4 Future of permafrost research	95
Acknowledgements.....	97
