Contents

Contents	7
Summary	11
Samenvatting.....	15
1 Introduction	19
1.1 Background: Compound flood risk in coastal deltas	19
1.2 Research challenges	21
1.3 Research questions and thesis outline	27
2 A global-scale assessment of compound flooding in deltas	31
2.1 Introduction.....	32
2.2 Methods.....	33
2.3 Results and discussion.....	40
2.4 Conclusions and future work.....	48
3 A hydrography upscaling method for scale-invariant hydrological modeling.....	51
3.1 Introduction.....	52
3.2 The Iterative Hydrography Upscaling algorithm.....	54
3.3 Methods.....	63
3.4 Accuracy of upscaling methods	66
3.5 Effect of upscaling method on simulated discharge	72
3.6 Discussion.....	75
3.7 Conclusions.....	77
4 HydroMT: Automated and reproducible model building and analysis	81
4.1 Statement of need	82
4.2 Functionality	83
4.3 Example usage.....	84
4.4 Audience.....	85
5 A globally-applicable compound flood hazard modeling framework ..	87
5.1 Introduction.....	88
5.2 Case study.....	90
5.3 Methods.....	90

5.4	Results and discussion.....	103
5.5	Conclusions and recommendations	113
6 	A globally-applicable compound flood risk modeling framework	115
6.1	Introduction.....	116
6.2	Methods.....	117
6.3	Results and discussion.....	127
6.4	Conclusions and recommendations	134
7 	Synthesis	137
7.1	Introduction.....	137
7.2	Main conclusions.....	137
7.3	Remaining challenges and directions for future research	141
7.4	Implications for flood risk management and adaptation.....	145
Appendices	149	
Appendix A-1	Validation of discharge based on GRDC observations	149
Appendix B-1	Upscaling methods used for benchmarking.....	151
Appendix B-2	River width interpolation.....	153
Appendix B-3	Examples of upscaling errors.....	154
Appendix B-4	Accuracy benchmark of upscaling methods.....	157
Appendix B-5	Sensitivity analysis IHU parameters.....	159
Appendix B-6	Sensitivity analysis runoff experiment	161
Appendix C-1	Comparison of observed water and simulated water levels.....	163
Appendix C-2	HydroMT configuration	164
Appendix C-3	Model skill for individual days during Idai and Eloise	166
Appendix C-4	Sensitivity analysis of compound flood dynamics.....	168
Appendix D-1	Flood drivers.....	169
Appendix D-2	100-year compound flood hazard sensitivity.....	173
List of abbreviations.....	175	
References	177	
Acknowledgements	203	
About the author	207	
List of publication	209
