Contents

Contents	5
Summary	7
Samenvatting	11
Résumé	15
1 Introduction	19
1.1 Flood risk in estuaries: an interplay of drivers.....	19
1.2 Definitions of compound flooding.....	23
1.3 Integrating the dynamics of compound flooding in flood risk assessments 26	
1.4 Understanding the dynamics of compound flooding and its drivers	28
1.5 Implications of hazard dynamics for disaster risk management.....	32
1.6 Goal and research questions	34
1.7 Outline of the thesis	34
2 Compound flood potential from river discharge and storm surge extremes	39
2.1 Introduction.....	40
2.2 Data and methods.....	43
2.3 Results and discussion.....	51
2.4 Limitations	58
2.5 Conclusions and outlook.....	60
3 A copula-based Bayesian Network for modelling the spatial dependence between coastal and fluvial flood drivers	65
3.1 Introduction.....	66
3.2 Materials and Methods	69
3.3 Results.....	77
3.4 Discussion.....	84
3.5 Conclusions.....	85

4 A flood risk framework capturing the seasonality of and dependence between rainfall and sea levels	89
4.1 Introduction.....	90
4.2 Case Study: Ho Chi Minh City.....	92
4.3 Data and Methods	92
4.4 Results and Discussion.....	100
4.5 Conclusion and Outlook.....	112
Intermezzo Research in action: the development of a serious game	115
5 Breaking the Silos: an online serious game for multi-risk disaster risk reduction management	123
5.1 Introduction.....	124
5.2 Game development and testing of the game.....	127
5.3 How to play the game	131
5.4 Game implementation and preliminary findings	140
5.5 Concluding remarks and outlook	146
6 Synthesis	149
6.1 Introduction.....	149
6.2 Key research findings	149
6.3 Remaining scientific challenges and ways forward.....	154
6.4 Implications for flood risk management and adaptation.....	160
Appendices.....	163
References	219
About the author	261
List of publications.....	263
Publications on which this thesis is based	263
Other publications	263
Acknowledgments.....	267
