CONTENTS

General introduction	9
PART 1: Clinical and microbial markers of disease outcomes in patients with <i>Clostridioides difficile</i> infection	19
Chapter 1 Prognostic factors for severe and recurrent <i>Clostridioides difficile</i> infection: a systematic review	21
Chapter 2 External validation of two prediction tools for patients at risk for recurrent <i>Clostridioides difficile</i> infection	51
Chapter 3 Simultaneous detection and ribotyping of <i>Clostridioides difficile</i> , and toxin gene detection directly on fecal samples	73
Chapter 4 Fecal microbiota composition is a better predictor of recurrent <i>Clostridioides difficile</i> infection than clinical factors – the PREDICD study	95
PART 2: Microbial markers in other diseases	139
Chapter 5 Accuracy of intestinal microbiota composition as a biomarker for type and activity of Inflammatory Bowel Disease – the MICROBE study	141
Chapter 6 Microbiota composition and mucosal immunity in patients with asymptomatic diverticulosis and controls	169
Chapter 7 Esophageal microbiota composition and outcome of esophageal cancer treatment: a systematic review	187
General discussion & future perspectives	207
APPENDIX	219
Nederlandse samenvatting	220
List of publications	227
Dankwoord	229
About the author	234
