CONTENTS

Chapter 1	General introduction	7
Part 1	Sonographic niche evaluation	
Chapter 2	Sonographic examination of uterine niche in non-pregnant women; a modified Delphi method (<i>UOG 2019</i>)	23
Chapter 3	Increased amplitude of subendometrial contractions identified by ultrasound speckle tracking in women with a cesarean scar defect (<i>RBM online 2023</i>)	67
Chapter 4	Definition and sonographic reporting system for Cesarean scar pregnancy in early gestation: modified Delphi method (<i>UOG 2022</i>)	95
Part 2	Niche development and changes over time after cesarean section	
Chapter 5	Changes in the uterine scar during the first year after a cesarean section: a prospective longitudinal study (<i>Gynecol Obstet Invest 2018</i>)	153
Chapter 6	Niche development and its changes over time after cesarean section and in subsequent pregnancy: a systematic review and meta-analysis (<i>submitted at AJOG</i>)	167
Chapter 7	Change of the residual myometrial thickness during pregnancies after laparoscopic niche resection in comparison to controls without niche surgery; a prospective comparative cohort study (<i>AJOG 2022</i>)	207
Part 3	Influence of surgical closure technique on niche development	
Chapter 8	Uterine cesarean closure techniques affect ultrasound findings and maternal outcomes: a systematic review and meta-analysis (<i>BJOG 2018</i>)	231
Chapter 9	Single- versus double-layer closure of the cesarean (uterine) scar in the prevention of gynecological symptoms in relation to niche development - the 2Close study: a multicentre randomised controlled trial (<i>BMC Pregnancy Childbirth 2019</i>)	273
Chapter 10	General discussion and future perspectives	295
Chapter 11	Summary Samenvatting	324 330
Appendices	List of co-authors List of abbreviations Portfolio Dankwoord Over de auteur	340 344 346 350 353
