Table of contents

Chapter 1 General Introduction and thesis outline

Part I Sex differences and markers for right ventricular maladaptation in pulmonary hypertension

Chapter 2 Interplay of sex hormones and long-term right ventricular adaptation in a Dutch PAH-cohort.

Chapter 3 Natriuretic peptides in precapillary PH

Part I) The battle of new biomarkers for right heart failure in pulmonary hypertension: is the queen of hearts NT-proBNP defeated at last?

Part II) Atrial and brain natriuretic peptides expression and release in precapillary pulmonary hypertension.

Chapter 4 Long-term Effects of pulmonary endarterectomy on pulmonary hemodynamics and RV function in chronic thromboembolic pulmonary hypertension.

Part II Phenotyping the right atrium in pre- and post-capillary pulmonary hypertension

Chapter 5 Bone morphogenetic protein 10 is increased in precapillary pulmonary hypertension patients.

Chapter 6 Right Atrial Adaptation in Pulmonary Hypertension: Pressure-Volume, Histologic and Single Cardiomyocyte Analysis.

Chapter 7 Right ventricular and right atrial function are less compromised in pulmonary hypertension secondary to heart failure with preserved ejection fraction: a comparison with pulmonary arterial hypertension with similar pressure overload.

Chapter 8 Summary and future perspectives
