CONTENTS

CHAPTER 1	General introduction and thesis outline	9
PART 1: SCREENING		
CHAPTER 2	Evaluation of six methylation markers derived from genome-wide screens for detection of cervical precancer and cancer <i>Epigenomics 2020</i>	35
CHAPTER 3	Risk-stratification of HPV-positive women with low-grade cytology by <i>FAM19A4/miR124-2</i> methylation and HPV genotyping <i>British Journal of Cancer 2021</i>	53
CHAPTER 4	Long-term CIN3+ risk of HPV positive women after triage with <i>FAM19A4/miR124-2</i> methylation analysis <i>Gynecologic Oncology 2019</i>	69
PART 2: MANAGEMENT		
CHAPTER 5	Classification of high-grade cervical intraepithelial neoplasia by p16 ^{INK4a} , Ki-67, HPV E4 and <i>FAM19A4/miR124-2</i> methylation status demonstrates considerable heterogeneity with potential consequences for management <i>International Journal of Cancer 2021</i>	87

CHAPTER 6	Clinical regression of high-grade cervical intraepithelial neoplasia is associated with absence of <i>FAM19A4/miR124-2</i> DNA methylation (CONCERVE study) <i>Journal of Clinical Oncology 2022</i>	107
CHAPTER 7	Methylation testing for the detection of recurrent cervical intraepithelial neoplasia <i>International Journal of Cancer 2023</i>	127
CHAPTER 8	General discussion	165
APPENDICES		
	English summary	167
	Nederlandse samenvatting	171
	List of publications	174
	List of contributing authors	176
	Dankwoord	179
	PhD portfolio	184
	About the author	187
