# Contents

Chapter 1	General introduction and thesis outline	9
<b>Part 1</b>	<b>Metabolic perturbations as trigger of disease in HCM</b>	<b>19</b>
Chapter 2	Unraveling the genotype-phenotype relationship in hypertrophic cardiomyopathy: obesity-related cardiac defects as a major disease modifier	21
Chapter 2	Editor's comment - Tracing triggers of cardiac remodeling and heart failure	51
Chapter 3	Western diet triggers cardiac dysfunction in heterozygous <i>Mybpc3</i> -targeted knock- in hypertrophic cardiomyopathy mice	57
Chapter 4	Heterozygous <i>Mybpc3</i> 2373insG mice do not develop cardiomyopathy in response to old age or Western diet-feeding	105
<b>Part 2</b>	<b>Metabolic perturbations as driver of disease in HCM</b>	<b>123</b>
Chapter 5	Mitochondrial dysfunction in human hypertrophic cardiomyopathy is linked to disruption of cardiomyocyte architecture and corrected by improving NADH-driven mitochondrial respiration	125
Chapter 5	Editorial: Targeting mitochondria in hypertrophic cardiomyopathy	159
Chapter 6	The strength of phenomics: combining clinical phenotype with multi-omics analyses of human cardiac tissue reveals opposite metabolic remodeling in genotype-positive and genotype-negative patients with obstructive hypertrophic cardiomyopathy	169
<b>Part 3</b>	<b>Methodological advances and considerations in basic and metabolic cardiac research</b>	<b>209</b>
Chapter 7	Characterization of cardiac metabolism in iPSC-derived cardiomyocytes: lessons from maturation and disease modelling	211
Chapter 8	Large scale contractility measurements reveal large atrioventricular and subtle interventricular differences in cultured unloaded rat cardiomyocytes	243
Chapter 9	Generating reference values on mitochondrial respiration in permeabilized muscle fibers	267
Chapter 10	Summary and discussion	273
<b>Appendices</b>		<b>287</b>
	Dutch summary / Nederlandse samenvatting	289
	Curriculum vitae	293
	List of publications	295
	Dankwoord	301
