# Table of contents

<b>Introduction</b>		<b>7</b>
<b>Section 1</b>	<b>Quantification of (changes in) white matter lesions in multiple sclerosis</b>	<b>19</b>
Chapter 1.1	Validation of a semi-automated method to quantify lesion volume changes in multiple sclerosis on 2D proton-density-weighted scans based on image subtraction	20
Chapter 1.2	Rule-based semi-automated method to segment T1 black holes on 2D brain images in multiple sclerosis	42
<b>Section 2</b>	<b>The relationship between the development of white matter lesions and atrophy in multiple sclerosis</b>	<b>61</b>
Chapter 2.1	Relationship between white matter lesions and gray matter atrophy in multiple sclerosis: A systematic review	62
Chapter 2.2	The spatio-temporal relationship between concurrent lesion and brain atrophy changes in early multiple sclerosis: A post-hoc analysis of the REFLEXION study	90
Chapter 2.3	The spatio-temporal relationship between white matter lesion volume changes and brain atrophy in clinically isolated syndrome and early multiple sclerosis	128
<b>Section 3</b>	<b>Predicting clinical and radiological disease progression based on early imaging features</b>	<b>159</b>
Chapter 3.1	Disease progression in the first 5 years of treatment in multiple sclerosis: Predictive value of early brain and lesion volume changes	160
<b>Discussion</b>		<b>185</b>
<b>Appendices</b>		<b>199</b>
