Contents

1	Introduction	1
2	Computational imaging through a multimode fiber	7
2.1	Light propagation in a step-index multimode fiber	7
2.1.1	Theory of an ideal step-index multimode fiber	7
2.1.2	Polarization coupling and imperfection	12
2.2	Spatial wavefront shaping	13
2.2.1	Transmission matrix	13
2.2.2	Spatial light modulator	14
2.2.3	Step-wise sequential algorithm	17
2.3	Raster-scan imaging through a multimode fiber	18
2.4	Compressive imaging through a multimode fiber	20
2.4.1	Compressive sensing computational framework	20
2.5	Experimental setup	24
2.5.1	Demonstration of raster-scan imaging	26
2.5.2	Demonstration of compressive imaging	27
3	Focus quality in raster-scan imaging via a multimode fiber	31
3.1	Introduction	32
3.2	Experimental setup	33
3.3	Results and discussion	35
3.4	Conclusion	40
	Appendix A: Experimental data of ellipticity and power ratio	41

Appendix B: Simulations of WFS through an MMF for different parameters	44
4 Comparison of round- and square-core fibers for sensing, imaging and spectroscopy	47
4.1 Introduction	48
4.2 Experimental setup	49
4.3 Results	51
4.3.1 Spatial wavefront-shaping approach	51
4.3.2 Light scrambling for imaging	55
4.3.3 Light scrambling for spectrometry	55
4.4 Conclusion	57
5 Wavefront shaping and imaging through a multimode hollow-core fiber	59
5.1 Introduction	60
5.2 Methods	61
5.2.1 Experimental setup	61
5.2.2 Spatial wavefront shaping	62
5.2.3 Imaging through a hollow core fiber	63
5.3 Results	64
5.4 Conclusion	66
6 Sub-diffraction computational imaging via a flexible multicore-multimode fiber	67
6.1 Introduction	68
6.2 Methods	69
6.2.1 Experimental setup	69
6.2.2 Image reconstruction algorithms	72
6.3 Results and Discussion	73
6.3.1 Fiber characterization	73
6.3.2 Sub-diffraction fiber imaging	76
6.3.3 Imaging through a flexible MCMMF probe	78
6.4 Conclusion	80
7 Speckle-based 3D super-resolution imaging through a multimode fiber	83
7.1 Introduction	84
7.2 Methods	85
7.2.1 Experimental setup	85
7.2.2 Computational reconstruction	88

7.2.3	Sample preparation	89
7.3	Results	89
7.4	Discussion and conclusion	94
7.5	Supplementary	97
7.5.1	The diffraction limit of the system	97
7.5.2	The super-resolution in the axial direction	98
7.5.3	Correlation analysis of speckles at different planes	99
7.5.4	The experimental setup of scattering coefficient measurement	100
7.5.5	Compare basis pursuit with Moore–Penrose inverse	101
7.5.6	Impact of noise	102
7.5.7	Results of 3D scattering samples	102
8	Summary and outlook	107
	Bibliography	111
	List of Publications	125
	Acknowledgements	127
