Contents

List of Tables	I
List of Figures	II
1 Introduction	
1.1 Background and motivation	2
1.2 Knowledge gaps in research	5
1.2.1 Grid parity studies on PV systems	5
1.2.2 Technological learning and learning curve model	7
1.2.3 PV installation planning optimization	8
1.2.4 The development of PV in China	9
1.3 Research questions and thesis outline	12
2 A review of grid parity assessment for solar photovoltaics	
Abstract	16
Keywords	16
2.1 Introduction	17
2.2 Review methodology	19
2.3 Results	21
2.3.1 Descriptive analysis of publications.....	21
2.3.2 An overview of the grid parity assessment framework.....	22
2.3.3 Levelized cost of electricity (LCOE)	22
2.3.4 Learning curve	32
2.3.5 The electricity price used in grid parity assessment	34
2.4 Discussion	35
2.4.1 The enhancements of grid parity assessment.....	35
2.4.2 Contributions, limitations, and avenues for further research.....	38
2.5 Conclusion	39
3 The cost of photovoltaics: Re-evaluating grid parity for PV systems in China	
Abstract	42

Keywords	42
3.1 Introduction	43
3.2 Grid parity and LCOE studies on PV installation	45
3.3 Methodology	47
3.3.1 Data source and basic data analysis	48
3.3.2 System LCOE	50
3.3.3 Grid parity index	52
3.3.4 Grid parity forecasting	53
3.4 Results	55
3.4.1 Development of system LCOE over time	55
3.4.2 The grid parity analysis of current PV systems	56
3.4.3 The prediction of grid parity in the future.....	59
3.5 Discussion	61
3.6 Conclusion	64
4 A system dynamics approach to technological learning impact for the cost estimation of solar photovoltaics	
Abstract	68
Keywords	68
4.1 Introduction	69
4.2 literature review	72
4.2.1 Learning curve and technological learning sources	72
4.2.2 System dynamics (SD)	74
4.3 Method and Data	75
4.3.1 Research framework.....	75
4.3.2 Learning curve model	76
4.3.3 System dynamics (SD) approach.....	79
4.4 Results	84
4.4.1 The learning rate based on four hypothetical models	84
4.4.2 The simulation results of experience, knowledge stock, and return in	

four hypothetical models using the SD approach	85
4.4.3 Cost estimation based on the simulations of four hypothetical learning curve models	87
4.5 Discussion and Conclusions.....	88
5 Towards carbon neutrality: A multi-objective optimization model for photovoltaics systems installation planning	
Abstract	94
Keywords	94
5.1 Introduction.....	95
5.2 Methods	98
5.2.1 Multi-objective optimization model (MOO model).....	99
5.2.2 Entropy-weighted TOPSIS decision-making model.....	103
5.2.3 China scenario and data	103
5.3 Results	105
5.3.1 The electricity demand forecasting results	105
5.3.2 The final PV installation layout	107
5.3.3 The contributions of the proposed PV installation plan to the carbon neutrality target.....	109
5.4 Discussions	112
5.5 Conclusions.....	115
6 General discussion	
6.1 Reflecting on the topic and approach	118
6.2 Summary of the research findings	119
6.3 Implications	126
6.3.1 Theoretical implications	126
6.3.2 Practical implications	128
6.4 Limitations and suggestions for future research.....	131
References.....	135
Summary	161
