Contents

Chapter 1. General introduction, aims and outline of the thesis

Quality of Data – Literature Review

Chapter 2. Literature Review: quality of primary care Electronic Health Record (EHR) data (*Published: Huisarts & Wetenschap August 2013*)

Quality and Reusability of Primary Care EHR Data – Hands-on identification of bottlenecks

Chapter 3. Reusability of coded data in the primary care EHR: a dynamic cohort study concerning cancer diagnoses (*Published: Int. J. Med. Inf. August 2016*)

Chapter 4. Do GPs know their cancer patients? A record linkage study assessing the quality of cancer registry in Primary Care (*Published: BMJ Open September 2016*)

Chapter 5. Primary Care management of women with breast cancer related concerns: a dynamic cohort study using a Network Database (*Published: Eur. J. Cancer Care June 2016*)

Strategies & Solutions for improving data quality and enabling data re-use and sharing

Chapter 6. A new coding system for metabolic disorders demonstrates gaps in the international disease classifications ICD-10 and SNOMED-CT which can be barriers to genotype-phenotype data sharing (*Published: Human Mutation July 2013*)

Chapter 7. SORTA: a System for Ontology-based Re-coding and Technical Annotation of biomedical phenotype data (*Published: Database, the journal of biological databases and curation September 2015*)

Chapter 8. Proposed roadmap to stepwise integration of genetics in family medicine and clinical research (*Published: Clinical & Translational Medicine, February 2013*)

Chapter 9. Summarizing Discussion

Chapter 10. Nederlandse Samenvatting, Dankwoord & Curriculum Vitae
