## TABLE OF CONTENT

<b>Chapter 1</b>	General introduction	7
------------------	----------------------	---

### Part A: Genetic effects and environment in depression

<b>Chapter 2</b>	No gene-by-environment interaction with 5-HTTLPR in a large Dutch sample <i>The Journal of Affective Disorders 2013</i>	25
<b>Chapter 3</b>	Association between depression and lower educational attainment not explained by shared genetic effects in ~25,000 individuals <i>Molecular Psychiatry 2015</i>	49
<b>Chapter 4</b>	Increased polygenic effects on depression in individuals exposed to childhood trauma in the Netherlands Study of Depression and Anxiety <i>The British Journal of Psychiatry 2014</i>	85
<b>Chapter 5</b>	No interaction between polygenic risk for depression and childhood trauma in 5,765 subjects from the Psychiatric Genomics Consortium <i>In preparation</i>	105

### Part B: Methodological aspects of study design, SNP-heritability, power and assortative mating

<b>Chapter 6</b>	Disease and polygenic architecture: avoid trio-design and appropriately account for unscreened controls for common disease <i>The American Journal of Human Genetics 2016</i>	143
<b>Chapter 7</b>	Exploring boundaries for the genetic consequences of assortative mating for psychiatric traits <i>JAMA Psychiatry 2016</i>	197
<b>Chapter 8</b>	Summary & General discussion	241
	Nederlandse samenvatting (Summary in Dutch)	262
	Dankwoord (Acknowledgements)	268
	Curriculum Vitae	271
	List of publications	272
	Dissertation series	277
