TABLE OF CONTENTS

Chapter 1	Introduction	11
Chapter 2	The predictive value of low heart rate and heart rate variability during stress for reoffending in delinquent male adolescents <i>Psychophysiology 2011, 11, 1596-1603</i>	23
Chapter 3	The predictive value of stress-related neurobiological parameters for disruptive behaviors after 5-year follow-up in delinquent male adolescents <i>Submitted</i>	41
Chapter 4	Concurrent attenuated reactivity of alpha-amylase and cortisol is related to disruptive behavior in male adolescents <i>Hormones and Behavior, revised manuscript, decision pending</i>	57
Chapter 5	Morning cortisol levels in delinquent and normal population adolescents: does cortisol qualify as a stable marker in adolescence? <i>Submitted</i>	79
Chapter 6	Longitudinal relationships between proactive and reactive aggression and autonomic nervous system reactivity in delinquent male adolescents: the moderating effect of posttraumatic stress symptoms <i>Submitted</i>	91
Chapter 7	Summary and general discussion	109
	References	125
	Nederlandse samenvatting	137
	Dankwoord	149
	Curriculum Vitae	157
