Contents

Reader's guide:	7
Introductory Section	8
1. Physics, biophysics, life, femtosecond, and photosynthesis	10
2. Theoretical and practical background of works presented in the focused section	18
2.1. Molecular quantum mechanics and the femtosecond.....	18
2.2. Transient absorption experiment	19
2.2.1. Semi classical picture	19
2.2.2. Technical realization of pump probe experiment	20
2.3. Global fitting analysis.....	21
2.4. Crucial elements from advanced theory of non linear spectroscopy.....	24
2.4.1. Density matrix.....	24
2.4.2. Interaction of density matrix with electric field	26
2.4.3. Pump probe spectroscopy in the light of Feynman diagram	29
2.5. Femtosecond stimulated Raman experiment	31
2.5.1. Stimulated Raman scattering.....	31
2.5.2. Femtosecond Stimulated Raman scattering – experiment	33
2.5.3. Time resolution and time resolved FSRS	34
2.5.4. Elements from the more complete theory of FSRS.....	38
2.5.5. Impulsive Raman scattering.....	39
2.5.6. 2D Raman spectroscopy	41
2.5.7. Generation of narrowband picoseconds pulses out of Femtosecond pulses	48
2.5.8. Future prospects for FSRS.....	50
2.6. Carotenoids.....	51
2.6.1. General properties and their excited states.....	51
2.7.2. Carotenoids in photosynthesis	54
Focused Section	57
3. Carotenoid Photoprotection In Artificial Photosynthetic Antennas	58
Abstract.....	58
Introduction	59

Materials and Methods.....	60
Synthesis	60
Spectroscopic measurements.....	61
Data Analysis.....	61
Results and discussion	62
Dyads in toluene	62
Dyads in THF.....	68
Conclusions	71
Supporting information	73
4. Wavelength-modulated femtosecond stimulated Raman spectroscopy – approach towards automatic data processing	74
Abstract:.....	74
Introduction	75
Methods.....	79
Femtosecond stimulated Raman spectroscopy.....	79
Data Analysis.....	80
Results.....	80
Wavelength modulation	80
Background filtering - polynomials.....	83
Background filtering – Fourier filter	85
FSRS experiment on β -carotene	87
Synthetic aryl carotenoid.....	90
Discussion.....	92
Wavelength modulation and background correction	92
Bleaching of the ground state signal	94
Long- living species	95
Conclusions	96
5. New light-harvesting roles of hot and forbidden carotenoid states in artificial photosynthetic constructs.....	98
Abstract:.....	98
Introduction	99
Methods.....	101

Synthesis of compounds	101
Spectroscopy	101
Data Analysis	102
Results and discussion	102
Fluorescence excitation spectra – results and discussion	102
Femtosecond transient absorption spectroscopy	104
Dyad-10 results	105
Dyad-10 discussion	106
Dyad-9 results	109
Dyad-9 discussion	110
Model carotenoids – results	112
Model carotenoids – discussion	112
Conclusions	113
6. Correction for the time dependent inner filter effect caused by transient absorption in femtosecond stimulated Raman experiment	115
Abstract	115
Introduction	116
Experimental:	119
Results	121
Derivation of correction factor α	121
Test experiment on charge separation in phthalocyanine-carotenoid dyad observed by FSRS	123
Correction for Raman evolution of β -carotene excited state relaxation	126
Discussion	127
Conclusions	130
7. High gain approach to femtosecond stimulated Raman spectroscopy and femtosecond transient absorption spectroscopy	132
Abstract	132
Femtosecond Stimulated Raman spectroscopy (FSRS)	133
Traditional versus high gain FSRS	134
High gain Femtosecond Stimulated Raman Experiment	136
Generalization of high gain approach	139

Increased requirement for pump pulse intensities	139
Time resolution	140
Tests of performance	141
Prospects of HGFSRS	143
Methods:	145
8. Direct observation of anharmonic couplings in β -carotene through Three-pulse frequency-domain two-dimensional stimulated Raman spectroscopy	146
Abstract	146
Introduction	147
Methods	148
Results	149
Mechanism of the FSRS and the time domain 2D-FSRS experiment.....	149
Principle of the frequency domain FSRS – experimental approach	151
Principle of frequency domain FSRS – underlying mechanism	153
Test experiment	154
Discussion.....	158
Comparison with similar methods.....	158
Baseline definition and signal normalization.....	159
Interpretation of recorded signals.....	159
Pulse intensities	160
Outlook	162
Conclusions	162
Acknowledgments.....	163
Supporting information	163
Summary	179
Samenvatting	180
