Table of Contents

Chapter 1:	General introduction	9
Chapter 2:	The impact of type 1 diabetes on brain functioning and structure: what have we learned?	19
Chapter 3:	Increased prevalence of brain microbleeds in adult type 1 diabetes patients with peripheral microangiopathy: relation with cerebral functioning	37
Chapter 4:	Functional brain connectivity and neurocognitive functioning in patients with long-standing type 1 diabetes with and without microvascular complications: a magnetoencephalography study	55
Chapter 5:	Resting-state brain networks in type 1 diabetes patients with and without microangiopathy and their relation with cognitive functions and disease variables	75
Chapter 6:	Diffusion tensor imaging in type 1 diabetes: decreased white matter integrity relates to cognitive functions	93
Chapter 7:	Differential impact of subclinical carotid artery disease on cerebral structure and functioning in type 1 diabetes patients with versus those without microangiopathy	107
Chapter 8:	Apolipoprotein E $\epsilon 4$ genotype is related to cerebral function and structure in longstanding type 1 diabetes patients	125
Chapter 9:	General Discussion	141
Appendix 1:	Online supplement of chapter 4	165
