Contents

Preface	iii
Contents	v
List of Figures	vii
List of Tables	viii
List of Abbreviations	ix
1 Introduction	1
1.1 Motivation and background	2
1.2 Valuation of travel time, schedule delays and variability	4
1.3 Structure	7
1.4 Scope	9
2 Prediction of travel time variability for cost-benefit analysis	11
2.1 Introduction	12
2.2 Data and variables	14
2.3 Empirical analysis of travel time variability	19
2.4 Implications for CBA	25
2.5 Conclusions	28
3 Door-to-door travel times in departure time choice models	31
3.1 Introduction	32
3.2 Related literature	35
3.3 Geographically Weighted Regression	38
3.4 Data	41
3.5 Results: Geographically Weighted Regression	44
3.6 Departure time choice models	46
3.7 Results: Departure time choice models	52
3.8 Conclusions	54
4 Overstating vs. overreacting: Commuters' perceptions of travel times	55
4.1 Introduction	56
4.2 Related literature	59
4.3 Specification of the travel time ratio	62

4.4	Behavioral models: Theoretical framework	67
4.5	Behavioral models: Data	69
4.6	Behavioral models: Estimations	72
4.7	Conclusions	78
5	Long- vs. short-run perspectives on scheduling	81
5.1	Introduction	82
5.2	Related literature	85
5.3	Modeling framework	86
5.4	Data	92
5.5	Estimation results: Main models	95
5.6	Estimation results: Robustness checks	98
5.7	Conclusions	102
6	Equilibrium with diverging long- and short-run scheduling preferences	103
6.1	Introduction	104
6.2	Modeling framework	106
6.3	Unpriced equilibrium	113
6.4	Social optima: An Introduction	115
6.5	First-best optimum	117
6.6	Second-best situation: Short-run toll only	119
6.7	Second-best situation: Long-run toll only	121
6.8	Conclusions	123
6.A	Proofs	125
7	Conclusions	129
7.1	Summary	130
7.2	Policy recommendations	132
7.3	Some suggestions for further research	134
A	The <i>Spitsmijden</i> experiment	137
A.1	Introduction	138
A.2	Experimental setting	138
A.3	Data sources	139
A.4	Datasets	141
A.5	Information behavior	142
A.6	Travel time distributions	145
	Bibliography	149
	Samenvatting (Dutch Summary)	161
