CONTENTS

1. General introduction	07
2. Missing data and imputation a practical illustration in a prognostic study on low back pain	19
3. Imputation and stability the search for stable prognostic models in multiple imputed data sets	41
4. Logistic regression and CART analysis the search for stable prognostic models in multiple imputed data sets	67
5. Prediction in general practice comparing clinical consensus from a Delphi procedure with a statistical scoring system	87
6. Prediction models in general practice the value of prognostic models for persistent shoulder pain in general practice	117
7. General discussion	139
Summary	159
Samenvatting	166
Dankwoord / Word of thanks	173
