Palliative Sedation in the Netherlands -

current practice and evaluation of tools for assessing depth of sedation
The work presented in this thesis was carried out at the Department of Anesthesiology, VU University Medical Centre Amsterdam and hospice Kuria Amsterdam and hospice Alkmaar, in collaboration with the EMGO+ Institute for Health and Care Research (departments of Nursing Home Medicine and Department of Public and Occupational Health), VU University Medical Centre Amsterdam and the Department of Public Health, Erasmus Medical Centre Rotterdam.

This PhD project was carried out within the framework of the AMROSE study (Amsterdam Rotterdam Sedation). The aim of the AMROSE study was to evaluate the current practice of palliative sedation after the introduction of the national guideline for palliative sedation.

The AMROSE study has been funded by a Netherlands Organisation for Health Research and Development (ZonMw1150.0004). In addition this PhD project was financially supported by hospice Kuria, Amsterdam and by the Comprehensive Cancer Center Netherlands, Amsterdam (IKNL). Financial support for the printing of this thesis has kindly been provided by the VU University.
