# CONTENTS

Scope of thesis

Summary/ Samenvatting

## Chapter 1: Introduction to Mars

1.1	Introduction to the planet Mars.....	17
1.2	Present climatic conditions at the Mars surface.....	18
1.2.1	Mars' atmosphere .....	18
1.2.2	Temperature and climate at the Mars surface.....	19
1.3	Age of Mars' surface .....	21
1.4	Mars composition and surface mineralogy .....	23
1.4.1	Magmatic rocks .....	23
1.4.1.1	Information from Martian meteorites.....	23
1.4.1.2	Information from space missions .....	25
1.4.2	Minerals and rocks suggesting past aqueous activities at Mars' surface .....	25
1.5	The Mars climate and its evolution.....	27
1.6	Search for life beyond Earth on Mars: Mars missions.....	28
1.6.1	Mars Science Laboratory, Curiosity rover .....	30
1.6.2	ExoMars mission .....	33
1.7	Conclusion .....	35
1.8	References.....	37

## Chapter 2: Raman and Laser induced breakdown Spectrometer (RLS)

2.1	Introduction.....	42
2.2	Principles of Raman spectroscopy .....	42
2.2.1	The Raman effect.....	43
2.2.2	Raman intensity .....	46
2.2.3	Number of normal modes of vibration .....	47
2.2.4	Vibrational dynamics of molecules and solid crystalline.....	47
2.2.5	Advantages and disadvantages of Raman Spectroscopy .....	49
2.3	Laser induced breakdown spectroscopy (LIBS).....	50
2.3.1	History of LIBS spectroscopy .....	51
2.3.2	The basic principles of LIBS .....	51
2.3.3	Advantages and disadvantages of LIBS spectroscopy .....	53
2.4	The RLS instrument.....	53
2.4.1	Laser sources .....	54
2.4.1.1	Raman laser source .....	54
2.4.1.2	LIBS laser source .....	59
2.4.2	Optical head.....	59
2.4.3	Spectrometer .....	61
2.5	Characteristics of the RLS instrument .....	66
2.5.1	Instrument resolution.....	66
2.5.2	Calibration of the CCD at different temperatures .....	67

2.5.2.2	Calibration of the CCD column number to wavelength.....	69
2.5.2.3	Accuracy of Raman shift values.....	72
2.5.3	CCD noise and the detection limit of Raman signals.....	76
2.6	Conclusion .....	77
2.7	References.....	79

### **Chapter 3: Manufacture and design of a new Mars atmosphere simulation chamber**

3.1	Introduction.....	84
3.2	Current Mars Chambers.....	85
3.3	MASC chamber: Required performance .....	86
3.4	Mars Atmosphere Simulation Chamber (MASC).....	88
3.4.1	General design philosophy .....	88
3.4.2	Vacuum isolation.....	89
3.4.3	Cooling screen .....	90
3.4.4	Design of door / flanges and mounting plates .....	92
3.5	Control and operation of the vacuum system .....	93
3.5.1	Design of the vacuum system.....	93
3.5.2	Selecting a suitable vacuum seal .....	94
3.6	The design, layout and operation of the cooling and heating system .....	98
3.6.1	Cooling / heating of the flanges.....	98
3.6.2	Cooling / heating of the cooling screen and mounting plate .....	101
3.6.3	Cooling the CCD of the RLS instrument.....	103
3.7	Control of the carbon dioxide (CO <sub>2</sub> ) in MASC .....	105
3.8	Temperature monitoring in the MASC.....	106
3.9	Temperature validation inside the MASC .....	107
3.10	Design of a sample holder with 3D linear stages.....	109
3.11	Conclusion and future applications.....	111
3.12	References.....	112

### **Chapter 4: The effect of ambient temperature and composition on the Raman study of olivine: implications for the stoichiometric changes**

4.1	Introduction.....	115
4.2	Sample selection .....	117
4.3	Analytical methods and data handing .....	118
4.3.1	Electron microprobe analyser.....	118
4.3.2	Micro-Raman spectrometer.....	120
4.3.3	The combined Raman and Laser induced breakdown Spectrometer (RLS) instrument.....	120
4.4	Raman study of olivine .....	121

4.5	Renishaw and RLS data of selected olivine samples.....	123
4.5.1	Discussion of the Renishaw olivine data.....	129
4.5.2	Discussion of the RLS olivine data.....	130
4.5.2.1	Effect of the vacuum condition and low temperature on RLS olivine Raman spectra.....	130
4.5.2.2	Effect of 8 mbar CO <sub>2</sub> pressure at low temperature on olivine Raman spectra.....	133
4.6	Conclusion.....	133
4.7	References.....	135

## **Chapter 5: Raman study of hydrated sulphates and carbonates under Martian conditions with the RLS instrument**

5.1	Introduction.....	138
5.2	Analytical procedure.....	139
5.2.1	Sample compositions.....	139
5.2.2	Raman analyses of hydrated sulphates: gypsum, barite and anglesite.....	139
5.2.3	Raman analyses of carbonates: calcite and aragonite.....	141
5.3	Renishaw data of hydrated sulphates and carbonates.....	142
5.4	RLS data of hydrated sulphates and carbonates samples.....	145
5.5	Raman data of selected hydrated sulphates and carbonates.....	153
5.5.1	Discussion on the Renishaw data of hydrated sulphates and carbonates.....	153
5.5.1.1	Renishaw Raman spectrum of gypsum (CaSO <sub>4</sub> ·2H <sub>2</sub> O).....	153
5.5.1.2	Renishaw Raman spectrum of barite (BaSO <sub>4</sub> ).....	154
5.5.1.3	Renishaw Raman spectrum of anglesite (PbSO <sub>4</sub> ).....	154
5.5.1.4	Renishaw Raman spectrum of calcite (CaCO <sub>3</sub> ).....	154
5.5.1.5	Renishaw Raman spectrum of aragonite (CaCO <sub>3</sub> ).....	155
5.5.2	Discussion on the RLS data of hydrated sulphates and carbonates.....	156
5.5.2.1	RLS Raman spectrum of gypsum (CaSO <sub>4</sub> ·2H <sub>2</sub> O).....	156
5.5.2.2	RLS Raman spectrum of barite (BaSO <sub>4</sub> ).....	156
5.5.2.3	RLS Raman spectrum of anglesite (PbSO <sub>4</sub> ).....	157
5.5.2.4	A comparison of the internal vibrations of sulphate groups in anglesite and barite.....	157
5.5.2.5	Raman spectra of gypsum, barite and anglesite at low temperature under 8 mbar CO <sub>2</sub> pressure and vacuum conditions.....	158
5.5.2.6	RLS Raman spectrum of calcite (CaCO <sub>3</sub> ).....	160
5.5.2.7	RLS Raman spectrum of aragonite (CaCO <sub>3</sub> ).....	160
5.5.2.8	A comparison between calcite and aragonite RLS Raman spectra.....	160
5.5.2.9	RLS Raman spectra of calcite and aragonite at low temperature under 8 mbar CO <sub>2</sub> pressure and vacuum condition....	161
5.6	Conclusion.....	161
5.7	References.....	163

## **Chapter 6: RLS capabilities under Martian conditions; current and future perspectives**

6.1	Performance of the RLS instrument under Martian conditions .....	167
6.2	Detection of minerals with the RLS instrument .....	168
6.3	Suggestions for improving the RLS instrument.....	173
6.3.1	Improving the Raman peak detection .....	173
6.3.1.1	Increase the laser power .....	173
6.3.1.2	Improvement of the Raman signal collection .....	174
6.3.1.3	Improvement in the SNR .....	176
6.3.1.4	Decrease thermal noise in the CCD cooling system .....	179
6.3.2	Improve the spectral range of RLS instrument above 3000 cm <sup>-1</sup> .....	179
6.4	Conclusion .....	181
6.5	References.....	183
Appendix	.....	184
