Contents

1. General introduction 9
  1.1 Introduction 10
  1.2 The role of impact assessment in policy processes 13
  1.3 The role of simulation models in impact assessments 15
  1.4 Thesis objectives 18
  1.5 Thesis overview 19

2. Future land use patterns in European catchments: scenario trends in urbanization, agriculture and land use 25
  2.1 Introduction 27
  2.2 Methodology 28
  2.3 Results and discussion 30
  2.4 Concluding remarks 37

3. Spatially explicit modelling of biofuel crops in Europe 43
  3.1 Introduction 45
  3.2 Methods 46
  3.3 Scenarios 56
  3.4 Results 58
  3.5 Discussion and conclusions 67

4. Impact assessment of the European biofuel directive on land use and biodiversity 75
  4.1 Introduction 77
  4.2 Methods 78
  4.3 Results 84
  4.4 Discussion 91

5. Impact of climate change on water management in Dutch peat polders 97
  5.1 Introduction 99
  5.2 Material and methods 100
  5.3 Results 108
  5.4 Discussion 115
6. Habitat types can be used for upscaling carbon emissions from plot to landscape level  
   6.1 Introduction  
   6.2 Material and methods  
   6.3 Results  
   6.4 Discussion  

7. Synthesis  
   7.1 Model selection  
   7.2 Multi-scale interactions  
   7.3 Policy cycle  
   7.4 Challenges for integrated environmental assessment  

Summary  
Samenvatting
