Table of contents

CHAPTER 1 INTRODUCTION 9
  1.1 The clinical problem 10
    1.1.1 Breast cancer incidence and risk factors 10
    1.1.2 Diagnosis and prognostic / predictive factors of outcome 11
    1.1.3 Treatment 12
  1.2 The genetic problem 13
    1.2.1 Diagnosis 13
    1.2.2 Cancer risks, surveillance, interventions, treatment 14
  1.3 Breast cancer susceptibility genes 17
    1.3.1 Risk conferred by breast cancer risk genes / alleles 17
    1.3.2 Mode of inheritance of breast cancer risk genes / alleles 18
    1.3.3 Individual breast cancer risk genes: high risk, moderate risk 19
    1.3.4 CHEK2 and CHEK2*1100delC 21
  1.4 Pathways 22
    FA/BRCA and ATM/CHEK2

AIMS AND OUTLINE OF THESIS 23

RESULTS 1: BRCA1 AND BRCA2 39
