## Contents

Scope and outline 7

**Chapter 1**  General introduction: Early molecular changes in Alzheimer disease – can we catch the disease in its presymptomatic phase?  
*Kerstin TS Wirz, Stella Keitel, Dick F Swaab, Joost Verhaagen and Koen Bossers*  
Journal of Alzheimer's Disease. 2013, in press. 13

**Chapter 2**  Concerted changes in transcripts in the prefrontal cortex precede neuropathology in Alzheimer’s disease  
*Koen Bossers, Kerstin TS Wirz, Gideon F Meerhoff, Anke HW Essing, Jeroen W van Dongen, Pieter Houba, Chris G Kruse, Joost Verhaagen and Dick F Swaab*  
Brain. 2010 Dec;133(Pt 12):3699-723. 51

**Chapter 3**  A comparison of selected mRNA and protein abundances of target genes involved in Alzheimer’s disease development  
*Kerstin TS Wirz, Pedro Haas, Koen Bossers, Dick F Swaab and Joost Verhaagen*  
109

**Chapter 4**  Cortical beta amyloid protein triggers an immune response, but no synaptic changes in the APPswe/PS1dE9 Alzheimer’s disease mouse model  
*Kerstin TS Wirz, Anita Stargardt, Koen Bossers, Willem Kamphuis, Dick F Swaab, Elly M Hol and Joost Verhaagen*  
Neurobiol Aging. 2013 May;34(5):1328-42. 133

**Chapter 5**  Egr/Mef2c transcription factors regulate the expression of genes potentially involved in the modulation of synaptic activity and plasticity during the early stages of Alzheimer’s disease  
*Kerstin TS Wirz, Ronald E van Kesteren, Anke HW Essing, Marion JM Sassen, August B Smit, Dick F Swaab, Joost Verhaagen and Koen Bossers*  
Manuscript in preparation. 199

**Chapter 6**  Summary and general discussion  
*Kerstin TS Wirz, Koen Bossers, Dick F Swaab and Joost Verhaagen*  
239
