## Contents

1 Introduction ................................................. 1
  1.1 Software Engineering ................................. 1
  1.2 Networked Software Development ..................... 2
  1.3 Research Questions and Motivation .................. 3
    1.3.1 Can we understand and identify organizational-social structures (OSSs) for Software Engineering? .......... 4
    1.3.2 Where do OSSs Play a Key Role During Networked Software Development? .......................... 7
    1.3.3 How can OSSs be Supported for Networked Software Development? .................................. 7
  1.4 Research Methods and Results Overview ............. 8
  1.5 Terminology ........................................... 11
  1.6 Related Work .......................................... 13
    1.6.1 Global Software Engineering ....................... 13
    1.6.2 Organizational and Social Structures in GSE ........ 15
    1.6.3 Supporting Communities During Software Development ........................................ 16
  1.7 Origin of Chapters .................................... 17

2 Organizational Social Structures for Software Engineering 19
  2.1 Introduction ........................................... 19
    2.1.1 Vision and Goals .................................. 19
    2.1.2 Structure of the chapter ........................... 20
  2.2 Approach and Primary Studies ....................... 20
  2.3 Results .................................................. 23
    2.3.1 OSS Types and their Relations .................... 24
    Communities ........................................... 25
    Networks ................................................ 35
    Groups .................................................. 41
    Teams .................................................. 44
    2.3.2 OSS Types’ Relations ............................... 46
    2.3.3 OSS Patterns and Transitions ..................... 46
3 On the Nature of GSE Organizational Structures

3.1 Introduction
3.2 Research Materials
3.3 Mapping OSS Types to GSE Factors
3.4 Discussion
3.5 Conclusion

4 Uncovering latent social communities in software development

4.1 Introduction
4.2 Identifying Communities, a Decision Problem
4.3 An OSS Decision Tree
4.4 Illustrative Scenario
4.5 Conclusion

5 Taking snapshots of development communities

5.1 Introduction
5.2 Materials and Methods
5.2.1 Empirical Samples
5.2.2 Research Methods
5.3 Discovering Community Snapshots, a Case-Study
5.3.1 Using a Questionnaire to Gather Data
5.3.2 Using a Checklist to Structure the Data
5.3.3 Applying the Decision-tree to Infer Community Types
5.3.4 Analysing Snapshots
5.4 The SEEDS Method
5.4.1 The SEEDS Questionnaire
5.4.2 The SEEDS Checklist
5.4.3 The SEEDS Decision-Tree
5.4.4 The SEEDS Analysis Framework
5.5 Discussions and Lessons Learned
5.6 Conclusion ................................................. 97

6 Dynamic Networked Organizations for Software Engineering 99
6.1 Introduction and Motivation ............................ 100
6.2 Case Study ............................................. 101
  6.2.1 Social and Organizational Challenges .......... 103
  6.2.2 Ad-Hoc Organizational Practices .............. 105
6.3 Discussions .......................................... 108
  6.3.1 Requirements in Developing with DyNOs .... 108
  6.3.2 Observations and Remarks ....................... 108
  6.3.3 Key Differences with Traditional Software Engineering . 109
6.4 Conclusion ............................................. 111

7 What is Social Debt In Software Engineering? 112
7.1 Introduction ........................................... 112
7.2 What Is Social Debt? .................................. 113
  7.2.1 Is your community in debt? ...................... 114
  7.2.2 How is your social debt different than your technical debt? 116
7.3 Observations and Discussion ......................... 116
7.4 Conclusion ............................................. 118

8 Services for Networked Software Development: A Feasibility Study 120
8.1 Introduction ........................................... 120
8.2 Research Design ..................................... 122
  8.2.1 Problem Statement .............................. 122
  8.2.2 Our Proposed Solution ......................... 122
  8.2.3 Case Scenario .................................. 124
  8.2.4 Wicked Problem ................................ 126
  8.2.5 Scenario Alternatives ......................... 126
8.3 Prototype Implementation ............................ 127
  8.3.1 SN-based Awareness Prototype .............. 127
  8.3.2 Scrum-based Awareness Prototype .......... 129
8.4 Results and Discussion .............................. 130
  8.4.1 Scrum vs SNs .................................. 130
8.5 Conclusion ............................................. 131

9 Designing Service Networks for Development Communities 133
9.1 Introduction ........................................... 133
9.2 Supporting Real Development Communities with Service Networks: Illustrative Scenario ... 135
9.3 Discussion ............................................. 137
