4.3.6 Evaluation of results ........................................ 45
4.4 Results .......................................................... 46
4.4.1 Evaluation of results .......................................... 48
4.5 Discussion ......................................................... 51
4.5.1 Observations during our study .............................. 51
4.5.2 Related work .................................................. 53
4.5.3 Limitations ..................................................... 53
4.5.4 Future work .................................................... 54
4.6 Conclusion ......................................................... 54

II SECONDARY USE OF PATIENT DATA .......................... 63
5 BARRIERS TO THE REUSE OF ROUTINELY RECORDED CLINICAL DATA: A FIELD REPORT ......................... 65
5.1 Introduction ....................................................... 65
5.2 Methods .......................................................... 66
5.3 Results ............................................................ 69
5.3.1 Required data ................................................. 69
5.3.2 Barriers to the reuse of routinely recorded clinical data 69
5.4 Discussion ........................................................ 73
5.4.1 Main Findings ................................................. 73
5.4.2 Related Work ................................................. 73
5.4.3 Strengths and limitations .................................... 74
5.4.4 Recommendations .......................................... 74
5.4.5 Conclusion ...................................................... 75

6 INFLUENCE OF DATA QUALITY ON CLINICAL QUALITY INDICATORS ........................................ 77
6.1 Background ....................................................... 78
6.2 Methods .......................................................... 79
6.2.1 Patient data .................................................... 79
6.2.2 Quality indicators and their computation ................ 80
6.2.3 Outcome measures .......................................... 80
6.3 Results ............................................................ 82
6.3.1 Patient matching .............................................. 82
6.3.2 Computation of quality indicators ......................... 82
6.3.3 Outcome measures .......................................... 84
6.3.4 Catalogue of encountered problems ....................... 85
6.4 Discussion ........................................................ 87
6.4.1 Comparison with other studies ............................ 87
6.4.2 Limitations of this study .................................... 87
6.4.3 Recommendations / Future Work ......................... 88
6.5 Conclusions ....................................................... 89
6.6 Appendix ........................................................ 90

7 SEMANTIC INTEGRATION OF PATIENT DATA AND QUALITY INDICATORS ........................................ 93
