# Table of Contents

<b>Chapter 1</b>	General introduction	Page 7
<b>Chapter 2</b>	Speeding up or slowing down? Gait adaptations to preserve gait stability in response to balance perturbations.	Page 23
<b>Chapter 3</b>	Stepping strategies for regulating gait adaptability and stability.	Page 37
<b>Chapter 4</b>	Steps to take to enhance gait stability: The effect of stride frequency, stride length, and walking speed on local dynamic stability and margins of stability.	Page 53
<b>Chapter 5</b>	Walking in an unstable environment: Strategies used by transtibial amputees to prevent falling during gait.	Page 67
<b>Chapter 6</b>	Stepping strategies used by post-stroke individuals to maintain margins of stability during walking.	Page 81
<b>Chapter 7</b>	Stepping asymmetry among individuals with unilateral transtibial limb loss could be functional in terms of gait stability.	Page 99
<b>Chapter 8</b>	Summary and general discussion	Page 115
	Nederlandse samenvatting	Page 129
	References	Page 139
	Dankwoord	Page 149
	About the author	Page 153
