Contents

1	Introduction	1
1.1	Historical background	1
1.2	The Ising model and its phase transition	2
1.3	The approach of Kac and Ward	4
1.4	Overview	6
2	Foundations and the critical point on the square lattice	9
2.1	Introduction and main results	9
2.1.1	Signed loops	11
2.1.2	Main results for the Ising model	12
2.1.3	Additional edges and loop length	15
2.1.4	The combinatorial identities	16
2.2	Proofs of the combinatorial identities	19
2.2.1	Expansion into collections of edge-disjoint loops	19
2.2.2	Extension to all loop configurations	22
2.2.3	Cancellation of non-edge-disjoint loop configurations	25
2.3	Bound on the operator norm of the transition matrix	31
2.4	Proofs of the results for the Ising model	33
2.4.1	Low- and high-temperature expansions of the partition function	33
2.4.2	Free energy density	35
2.4.3	Low-temperature two-point functions	38
2.4.4	High-temperature two-point functions	40
3	Multi-point correlations and dual boundary conditions	45
3.1	Introduction and main results	45
3.2	Stars and pinned generating functions	47
3.3	Low-temperature multi-point functions	49
3.4	High-temperature multi-point functions	50
3.5	Low-temperature correlations with free boundary conditions	51
3.6	High-temperature correlations with positive boundary conditions	52
3.7	Proofs of the combinatorial identities	54

3.8	Proofs of the results for the Ising model	56
4	The critical point and the spectral radius of the transition matrix	61
4.1	Results for the Ising model	62
4.1.1	The main result	64
4.1.2	The isoradial case	66
4.1.3	Implications for the magnetic phase transition	67
4.2	Results for the Kac–Ward operator	68
4.2.1	Bounds on the spectral radius and operator norm	70
4.2.2	High- and low-temperature spectral radii	73
4.3	Proof of the main result	75
5	The fermionic observable and the inverse Kac–Ward operator	77
5.1	The inverse Kac–Ward operator and non-backtracking walks	79
5.1.1	Signed non-backtracking walks	79
5.1.2	The inverse Kac–Ward operator	81
5.2	The Kac–Ward operator on isoradial graphs	83
5.2.1	The critical Kac–Ward operator and s-holomorphicity	83
5.2.2	A discrete Riemann–Hilbert boundary value problem	85
5.2.3	The non-backtracking walk representation	86
5.3	Proofs of the main results	87
5.3.1	Proof of Theorem 5.2	87
5.3.2	Proof of Theorem 5.4	91
5.3.3	Proof of Theorem 5.6	92
	Bibliography	97
	Summary	101
	Samenvatting	103
	Acknowledgements	105
