TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis	11
PART I	Next generation sequencing in diagnostics: recent implementation of a new opportunity in clinical genetics	25
Chapter 2	Reflecting on earlier experiences with unsolicited findings: points to consider for next generation sequencing and informed consent in diagnostics <i>Human Mutation 2013, 34:1322-1328</i>	27
Chapter 3	Informed consent for exome sequencing in diagnostics: exploring first experiences and views of professionals and patients <i>Clinical Genetics 2014, 85:417-422</i>	43
PART II	Neonatal screening for Pompe disease: a potential opportunity for public health	57
Chapter 4	Severely impaired health status at diagnosis of Pompe disease: A cross-sectional analysis to explore the potential utility of neonatal screening <i>Molecular Genetics and Metabolism 2012, 107:448-455</i>	59
Chapter 5	Public support for neonatal screening for Pompe disease: a broad-phenotype condition <i>Orphanet Journal of Rare Diseases 2012, 7:15</i>	75
Chapter 6	Newborn screening for Pompe disease? A qualitative study exploring professional views <i>BMC Pediatrics 2014, 14:203</i>	97
PART III	Testing for monogenic subtypes of common disorders: ongoing implementation of new genetic services in “mainstream medicine”	117
Chapter 7	Developing a framework for implementation of genetic services: learning from examples of testing for monogenic forms of common diseases <i>Journal of Community Genetics 2014, June 4.</i> <i>Epub ahead of print, doi: 10.007/s12687-014-0189-x</i>	119

PART IV	General discussion & Summary	139
Chapter 8	General discussion	141
Chapter 9	Summary Samenvatting	155
Addendum	Dankwoord	165
	About the author	169
	Publications	171
