## TABLE OF CONTENTS

<b>Chapter 1</b>	General introduction	7
<b>Chapter 2</b>	Objective and aims	25
<b>PART I PRENATAL AND POSTNATAL GROWTH OF PRETERM INFANTS</b>		<b>35</b>
<b>Chapter 3</b>	Growth in preterm infants until six months post-term: the role of insulin and IGF-I	37
<b>Chapter 4</b>	Lean mass and fat mass accretion between term age and six months post-term in growth restricted preterm infants	51
<b>Chapter 5</b>	Small-for-gestational-age preterm-born infants already have lower bone mass during early infancy	65
<b>Chapter 6</b>	Procollagen type I N-terminal peptide (PINP) in preterm infants is associated with growth during the first six months post-term	81
<b>PART II POSTDISCHARGE NUTRITION</b>		<b>97</b>
<b>Chapter 7</b>	Increased gain in bone mineral content of preterm infants fed an isocaloric, protein- and mineral-enriched postdischarge formula	99
<b>Chapter 8</b>	Post-term dietary-induced changes in DHA and AA status relate to gains in weight, length, and head circumference in preterm infants	109
<b>Chapter 9</b>	Higher vitamin D intake in preterm infants fed an isocaloric, protein- and mineral-enriched postdischarge formula is associated with increased bone accretion	125
<b>Chapter 10</b>	Iron deficiency and anemia in iron-fortified formula and human milk fed preterm infants until six months post-term	141
<b>Chapter 11</b>	General discussion	157
<b>Chapter 12</b>	Summary	173
	Nederlandse samenvatting	179
<b>Appendix</b>	Appendix A	183
	Appendix B	187
<b>Abbreviations</b>		189
<b>Publications</b>		193
<b>Curriculum vitae</b>		197
<b>Dankwoord</b>		201
