# CONTENT

	General introduction and outline of the thesis	10
Part I	Techniques in minimally invasive esophagectomy for cancer	
<b>Chapter 1</b>	Laparoscopic versus open transhiatal resection for distal and junction cancer.	20
<b>Chapter 2</b>	Cervical or thoracic anastomosis after esophagectomy for cancer: a systematic review and meta-analysis.	34
<b>Chapter 3</b>	Minimally invasive intrathoracic anastomosis after Ivor Lewis esophagectomy for cancer. A review of transoral or transthoracic use of staplers.	48
<b>Chapter 4</b>	Technique and short-term outcome of minimally invasive Ivor Lewis esophageal resection for distal esophageal and gastroesophageal junction cancers.	64
Part II	A randomized trial	
<b>Chapter 5</b>	Preliminary experience of minimally invasive esophagectomy for cancer.	80
<b>Chapter 6</b>	Minimally invasive versus open esophagectomy for patients with esophageal cancer: a multicentre, open-label, randomized controlled trial.	90
<b>Chapter 7</b>	Quality of life after minimally invasive and open esophagectomy: results of a randomized trial.	106
Part III	Impact of minimally invasive esophagectomy	
<b>Chapter 8</b>	Immunological changes after minimally invasive or conventional esophageal resection for cancer: a randomized trial.	124
<b>Chapter 9</b>	The cost-effectiveness of minimally invasive esophagectomy for esophageal cancer, a cost analysis of a randomized controlled trial.	140
