CONTENTS

Chapter 1	7
General Introduction	
Chapter 2	19
Cell mediated contraction in 3D cell-matrix constructs leads to spatially regulated osteogenic differentiation	
Chapter 3	41
From skeletal development to tissue engineering: lessons from the micromass assay	
Chapter 4	65
The effect of growth-mimicking continuous strain on the early stages of skeletal development in micromass culture	
Chapter 5	83
Linear patterning of mesenchymal condensations is modulated by geometric constraints	
Chapter 6	107
General Discussion	
Chapter 7	121
Summary / Nederlandse samenvatting	
Appendices:	131
About the author	133
List of publications	135
Acknowledgements	137
