# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Concepts . . . . .	1
1.1.1	Stochastic Models . . . . .	1
1.1.2	Sensitivity Analysis . . . . .	5
1.2	Approaches to Gradient Estimation . . . . .	11
1.2.1	Pathwise Differentiation . . . . .	12
1.2.1.1	Infinitesimal Perturbation Analysis . . . . .	13
1.2.1.2	Smoothed Perturbation Analysis . . . . .	14
1.2.1.3	Finite Difference Method . . . . .	16
1.2.2	Distributional Differentiation . . . . .	17
1.2.2.1	Score Function Method . . . . .	19
1.2.2.2	Measure-Valued Differentiation . . . . .	21
1.2.3	Simulation Considerations . . . . .	24
1.2.4	Examples . . . . .	26
1.2.4.1	Exponential Distribution . . . . .	26
1.2.4.2	Normal Distribution . . . . .	29
1.3	Outline of the Thesis . . . . .	33
1.3.1	Distributional methods into Quantile-based Sensitivity Estimation . . . . .	34
1.3.2	Extrinsic Greeks of Options . . . . .	36
<b>2</b>	<b>An Investigation into the Derivative Estimation of Ranked-Data Statistics</b>	<b>39</b>
2.1	Introduction . . . . .	39
2.2	Derivative Estimation of Ranked-Data . . . . .	41
2.2.1	The Basic Estimators . . . . .	41
2.2.2	A Lemma . . . . .	42
2.3	The Order Statistic Problem . . . . .	43
2.3.1	Technical Analysis . . . . .	44
2.3.2	Numerical Examples . . . . .	46
2.3.2.1	Quality Control of Steel Production . . . . .	47
2.3.2.2	Performance of a Basket of Stocks . . . . .	48
2.4	The Quantile Problem . . . . .	55
2.4.1	Technical Analysis . . . . .	55
2.4.2	Examples . . . . .	70
2.4.2.1	A PERT Graph . . . . .	71

2.4.2.2	A Queueing Network Example . . . . .	74
2.5	Guidelines for Derivative Estimation of Order Statistic Related Performance Characteristics . . . . .	78
<b>3</b>	<b>Supplemental Analysis of MVD Ranked-Data Estimators</b>	<b>83</b>
3.1	Introduction . . . . .	83
3.2	Presentation of the Results . . . . .	85
3.2.1	Preliminaries . . . . .	85
3.2.2	Asymptotic Expectation . . . . .	87
3.2.3	Asymptotic Variance: Standard Estimator . . . . .	91
3.2.4	Asymptotic Variance: Symmetric Estimator . . . . .	93
3.2.5	Comparisons of Variance . . . . .	95
3.2.6	Importance Sampling . . . . .	98
3.3	Analysis . . . . .	99
3.4	Derivations . . . . .	101
3.4.1	Asymptotic Variance: Standard Estimator . . . . .	101
3.4.2	Asymptotic Variance: Symmetric Estimator: . . . . .	113
3.4.3	Importance Sampling . . . . .	123
<b>4</b>	<b>A Distributional approach for Quantile Derivative Estimation</b>	<b>127</b>
4.1	Introduction . . . . .	127
4.2	Quantile Sensitivity Analysis . . . . .	129
4.3	Statistical Analysis . . . . .	132
4.3.1	Main Analysis . . . . .	132
4.3.2	Extensions . . . . .	144
4.4	Distributional Differentiation . . . . .	146
4.4.1	Basic Definitions . . . . .	146
4.4.2	The Inverse-Transformation Approach and Extensions for Finite Product Measures . . . . .	148
4.4.3	Incorporating Distributional Derivative Estimators . . . . .	150
4.5	Application to Queues . . . . .	156
4.6	Application to Financial Risk Management . . . . .	158
4.6.1	The Underlying Financial Models . . . . .	158
4.6.1.1	Geometric Brownian Motion . . . . .	159
4.6.1.2	The Variance Gamma Model . . . . .	160
4.6.2	VaR of a Single Option Contract . . . . .	162
4.6.2.1	A Vanilla Call Option . . . . .	162
4.6.2.2	Rainbow Options . . . . .	168
4.6.3	VaR of a Stock Portfolio . . . . .	172

<b>5</b>	<b>Extrinsic Greeks of Options</b>	<b>179</b>
5.1	Introduction . . . . .	179
5.2	Sensitivity Analysis of Multi-Asset Digital Options . . . . .	182
5.2.1	The Digital Spread Option . . . . .	188
5.2.2	The Digital Madonna Rainbow Option . . . . .	189
5.2.3	The Asset/Cash-or-Nothing Option . . . . .	190
5.3	Barrier-type Options . . . . .	191
5.3.1	The Extreme Values of a Drift-Diffusion Brownian Motion . . . . .	191
5.3.1.1	The Joint Densities of $(Z_t, Z_t^*)$ and $(Z_t, Z_t^{\star})$ . . . . .	191
5.3.1.2	The Conditional Densities of $Z_t^*$ and $Z_t^{\star}$ given $Z_t$ . . . . .	192
5.3.2	Barrier Options . . . . .	193
5.3.3	Step Options . . . . .	194
5.3.3.1	General Analysis . . . . .	194
5.3.3.2	Numerical Experiment . . . . .	197
5.4	Parisian Options . . . . .	199
5.4.1	General Analysis . . . . .	199
5.4.2	Critical Events . . . . .	203
5.4.3	Overall Algorithm . . . . .	207
5.4.4	An Importance Sampling Approach . . . . .	208
5.4.5	Numerical Experiments . . . . .	213
<b>A</b>	<b>Technical Appendices</b>	<b>219</b>
A.1	Uniform Integrability of Spacings . . . . .	219
A.2	Uniform Order Statistic Expectations for extent of Asymptotic Unbiasedness Derivations . . . . .	222
A.3	Verification of Assumptions of Call Option Quantile Sensitivities . . . . .	223
A.3.1	$\alpha$ -Quantile Delta . . . . .	224
A.3.2	$\alpha$ -Quantile Vega . . . . .	228
<b>B</b>	<b>Measure-Valued Derivatives for the Bivariate Normal Distribution</b>	<b>231</b>
B.1	Measure-Valued Derivatives . . . . .	231
B.2	Alternative Representation . . . . .	235
	<b>Summary</b>	<b>249</b>
	<b>Samenvatting</b>	<b>253</b>
	<b>Acknowledgements</b>	<b>255</b>

# List of Figures

1.1	Graph of the Stochastic Activity Network (SAN). . . . .	3
2.1	RMS error plot: Quality Control of Steel Production example . . . .	49
2.2	Coverage probability plot for the 95% CI: Performance Control of a Basket of Stocks example . . . . .	53
2.3	Graph of the Stochastic Activity Network (SAN). . . . .	71
2.4	RMS error plot: PERT Graph example . . . . .	74
2.5	Coverage probability plot for the 95% CI: A Queueing Network example . . . . .	79
3.1	Equivalent almost sure outcomes for $Z_{[\alpha m]:m}^+ Z_{[\alpha m]:m}^-   \mathbf{Z} \setminus Z_m$ . . . .	95
5.1	Mean estimates plot for the Step option barrier sensitivity: $(r, \sigma) = (0.03, 0.40)$ . . . . .	199
5.2	Price paths that contain no critical events: . . . . .	205
	5.2(a) A path with run of length $2\alpha$ . . . . .	205
	5.2(b) A path with two runs of length $\alpha$ . . . . .	205
5.3	Price paths that contain barrier-activating critical events . . . . .	205
	5.3(a) Path with single run of length $\alpha$ . . . . .	205
	5.3(b) Path with single run of length $l$ and $\alpha < l \leq 2\alpha - 1$ . . . . .	205
5.4	Price paths that contain non-barrier-activating critical events . . . .	206
	5.4(a) Path with border critical events . . . . .	206
	5.4(b) Path with a hole critical event . . . . .	206
5.5	Example price path for Parisian option sensitivity estimation via Importance Sampling . . . . .	209
5.6	Mean estimates plot for the Parisian option barrier sensitivity: $(r, \sigma) = (0.03, 0.40)$ . . . . .	217
5.7	Mean estimates plot for the Parisian option barrier sensitivity: $(r, \sigma) = (0.07, 0.20)$ . . . . .	217

# List of Tables

2.1	Summary Statistics: Quality Control of Steel Production example . .	48
2.2	Summary Statistics: Performance Control of a Basket of Stocks example . . . . .	52
2.3	Comparison with SPA: Portfolio Credit Risk example by Fu, Hong, and Liu; [32] . . . . .	55
2.4	Summary Statistics: PERT Graph example . . . . .	75
2.5	Summary Statistics: A Queueing Network example . . . . .	78
5.1	Parameters $(\alpha, \theta)$ : Step option barrier sensitivity numerical experiment. . . . .	197
5.2	Summary statistics: Step option barrier sensitivity: $(r, \sigma) = (0.03, 0.40)$ . . . . .	198
5.3	Comparison of different methods for Parisian option barrier sensitivity estimation: $(r, \sigma) = (0.03, 0.40)$ . . . . .	213
5.4	Comparison of different methods for Parisian option barrier sensitivity estimation: $(r, \sigma) = (0.07, 0.20)$ . . . . .	214
5.5	Parameters $(\alpha, \theta)$ : Parisian option barrier sensitivity numerical experiment . . . . .	214
5.6	Summary statistics: Parisian option barrier sensitivity: $(r, \sigma) = (0.03, 0.40)$ . . . . .	215
5.7	Summary statistics: Parisian option barrier sensitivity: $(r, \sigma) = (0.07, 0.20)$ . . . . .	216
