Contents

Acknowledgments	15
1 Introduction	19
1.1. Backgrounds	19
1.2. Aims and objectives	21
1.3. Thesis outline	22
2 External controls on Quaternary fluvial incision and terrace formation in the Segre River, southern Pyrenees	25
2.1. Introduction	26
2.2. Regional settings	28
2.2.1. Geological overview of the Pyrenees	28
2.2.2. Quaternary climate and glaciations	29
2.2.3. The drainage system of the southern Pyrenees	30
2.3. Materials and methods	35
2.4. Results	36
2.4.1. The Segre terrace staircase	36
2.4.2. Longitudinal correlation of the Segre terraces	42
2.4.3. Terrace thickness and height anomalies	43
2.5. Discussion	45
2.5.1. Regional terrace staircases	45
2.5.2. Base level mechanisms	46
2.6. Conclusions	49
3 Terrace staircase development in the southern Pyrenees foreland: inferences from ¹⁰Be terrace exposure ages in the Segre River	51

Table of contents

3.1. Introduction	52
3.2. Regional settings	53
3.3. Methods	55
3.3.1. Exposure dating by TCN concentration-depth-profiles	55
3.3.2. Exposure age calculations from cosmogenic nuclides	59
3.4. Sampling sites and exposure age results	61
3.4.1. Terrace level TQ4	61
3.4.2. Terrace level TQ3	64
3.4.3. Terrace level TQ2	67
3.4.4. Terrace level TQ1	69
3.5. Discussion	73
3.5.1. Inferences from the Profile Rejuvenation results	73
3.5.2. Timing of terrace staircase formation in the Segre River	74
3.6. Conclusions	78
4 Linking morphology across the glaciofluvial interface: a ¹⁰Be supported chronology of glacier advances and terrace formation in the Garonne River, northern Pyrenees, France	79
4.1. Introduction	80
4.2. Setting	82
4.2.1. The Pyrenees: a geologic overview	82
4.2.2. Quaternary climate and glaciations in the (northern) Pyrenees ..	84
4.2.3. Pliocene-Quaternary drainage development in the northern Pyrenees foreland	86
4.2.4. Valley asymmetries in the southern Aquitaine foreland basin	87
4.3. Methodology	89
4.3.1. General approach	89
4.3.2. Qualitative estimates on postdepositional sediment weathering	89

4.3.3. Exposure dating using in situ produced terrestrial cosmogenic nuclide ^{10}Be	90
4.4. The Garonne drainage pattern and its structural controls	92
4.5. The glacial and fluvial morphology of the middle Garonne	94
4.5.1. The terminal glacial basin of Loures-Barousse–Barbazan	94
4.5.2. The fluvial terrace staircase of the middle Garonne	99
4.5.3. ^{10}Be exposure dating on the abandonment of terrace level T6 ..	106
4.6. Discussion	110
4.6.1. Long-term river incision in the northern Pyrenees foreland	110
4.6.2. The Garonne terrace staircase chronology	112
4.6.3. Relative chronologies at the glaciofluvial interface	115
4.7. Conclusions	118
4.8. Appendix	119
5 Numerical modelling of terrace staircase formation in the Quaternary drainage system of the southern Pyrenees, Ebro basin, NE Iberia	129
5.1. Introduction	130
5.2. Regional setting	132
5.2.1. Brief geologic history of the study area	132
5.2.2. The Neogene climatic development in the Ebro foreland basin	133
5.2.3. Brief history of the exorheic Ebro drainage system	134
5.3. Landscape evolution model (model description)	138
5.4. Tested scenarios for terrace staircase formation in the Ebro drainage basin	144
5.5. Modelling results and interpretations	146
5.5.1. Model behaviour without additional external forcing (model A)	146
5.5.2. Forward-model with climatic forcing (model scenario B)	149

Table of contents

5.5.3. Quaternary drainage development following a late Pliocene uplift event (model scenario C).....	152
5.5.4. Stream profile development in response to Quaternary uplift and climate variability (model D)	156
5.6. Discussion	160
5.6.1. Climate effects on stream profile development.....	160
5.6.2. Tectonic uplift	161
5.6.3. Lithospheric flexural isostasy	163
5.6.4. Model implications for the Messinian sea-level drawdown	165
5.7. Conclusions	165
6 Synthesis	167
6.1. Primary aims and general approach	167
6.2. Pliocene–Quaternary drainage development in the Pyrenees	168
6.3. External controls on incision and terrace staircase formation	169
6.3.1. Climate	169
6.3.2. Base level controls	172
6.3.3. Tectonics	174
6.4. Implications for future research	176
7 References	179
8 List of figures	201
9 List of tables	208
10 Thesis summaries	209
10.1. English summary	209
10.2. Dutch summary	212
