Consequences of
Multilevel Governance
Consequences of Multilevel Governance

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan
de Vrije Universiteit Amsterdam,
op gezag van de rector magnificus
prof.dr. F.A. van der Duyn Schouten,
in het openbaar te verdedigen
ten overstaan van de promotiecommissie
van de Faculteit der Sociale Wetenschappen
op woensdag 3 december 2014 om 9.45 uur
in de aula van de universiteit,
De Boelelaan 1105

door

Benjamin Helge Neudorfer

geboren te Reutlingen, Duitsland
promotoren: prof.dr. G.W. Marks
            prof.dr. E.A.E.B. Hooghe

1 Introduction 1

1.1 Consequences of Multilevel Governance 4

1.2 Outline 5

1.3 The Bigger Picture 7

2 Decentralization and Political Corruption: Disaggregating Regional Authority 9

2.1 Introduction 10

2.2 Concepts and (Rival) Explanations 12

2.2.1 Accountability, Collusion, and Fragmentation 13

2.2.2 Regional vs. Vertical Competition 14

2.2.3 Tying the Ends Together 15

2.3 Theory and Hypotheses 16

2.3.1 Assumptions on Actors’ Preferences and Behavior 16

2.3.2 Self-Rule: Local Collusion and Corruption Networks 17

2.3.3 Shared Rule: Oversight Hinders Corruption on the National Level 20

2.4 Data and Method 22

2.4.1 Political Corruption 22

2.4.2 Decentralization 25

2.4.3 Control Variables and Sample 27

2.4.4 Method of Analysis 28

2.5 Results 29

2.5.1 Predicted Probabilities 30

2.5.2 Robustness of the Results 36

2.5.3 Discussion 37

2.6 Conclusion 38

2.7 Appendix 40

2.7.1 Robustness Analysis: Alternative Measures of Decentralization 52

3 Decentralization and Political Corruption in Presidential and Parliamentary Systems 67

3.1 Introduction 68

3.2 State of the Art 69
CONTENTS

3.3 Theory .............................................................. 72
  3.3.1 Actors and Corrupt Behavior ................................. 73
  3.3.2 Shared Rule in Countries with a Parliamentary System .. 74

Nederlandse Samenvatting: Gevolgen van Multilevel Governance  207
List of Figures

2.1 Effect of increasing levels of self-rule (Figures 2.1a and 2.1b) and shared rule (Figures 2.1c and 2.1d) on levels of political corruption: predicted probabilities and 95% confidence intervals. Shared rule and, respectively, self-rule as well as presidential system at 50th percentiles, control variables at their means. ................................. 33
2.2 Variation in the ICRG index over time by country ................. 47
2.3 Variation in self-rule over time by country ..................... 48
2.4 Variation in shared rule over time by country .................. 49
2.5 Margins plots of the effect of self-rule on a low level of political corruption (ICRG category one) based on Table 2.12. Vertical lines represent 50th, 75th, and 90th percentiles of self-rule. Other variables at their means. ................................................................. 64
2.6 Margins plots of the effect of self-rule on a high level of political corruption (ICRG category four) based on Table 2.12. Vertical lines represent 50th, 75th, and 90th percentiles of self-rule. Other variables at their means. ................................................................. 64
2.7 Margins plots of the effect of shared rule on a low level of political corruption (ICRG category one) based on Table 2.12. Vertical lines represent 50th, 75th, and 90th percentiles of shared rule. Other variables at their means. ................................................................. 65
2.8 Margins plots of the effect of shared rule on a high level of political corruption (ICRG category four) based on Table 2.12. Vertical lines represent 50th, 75th, and 90th percentiles of shared rule. Other variables at their means. ................................................................. 65
3.1 Distribution of the Variables of Main Interest .................. 85
3.2 Effect of Shared Rule on a Low Level of Corruption (ICRG Category 1), Based on Model 2 in Table 3.3 .............................. 94
3.3 Effect of Shared Rule on a Medium-High Level of Corruption (ICRG Category 4), Based on Model 2 in Table 3.3 .................. 94
3.4 Effect of Shared Rule on the Level of Corruption (CPI Data), Based on Model 2 in Table 3.4 ........................................... 95
3.5 Effect of Shared Rule on the Level of Corruption (WGI Data), Based on Model 5 in Table 3.4 ........................................... 95
3.6 Separation Plot Showing the Model Fit Based on Model 2 in Table 3.3 for the Five ICRG Categories (Dark Lines Represent Observations) . 96
3.B.1 Effect of Shared Rule on a Medium-Low Level of Corruption (ICRG Category 2), Based on Model 2 in Table 3.3 .................. 106
3.B.2 Effect of Shared Rule on a Medium Level of Corruption (ICRG Category 3), Based on Model 2 in Table 3.3 .................. 106

Acknowledgements

Reflecting on the past makes one realize how much one has received. I am particularly grateful to my supervisors, Liesbet Hooghe and Gary Marks, for their support during the past years. Your feedback on each part of my dissertation has been invaluable. Especially, your comments on the plausibility of theoretical arguments have always given me much food for thought and helped me in improving the quality of my dissertation. Not least, I am deeply impressed by how much you get involved with all the details of the research process from conceptualization to measurement decisions and to the fine art of glazing research with the most effective and elegant communication. Since my Ph.D. project has been part of an ERC grant project, I also acknowledge funding for my Ph.D. position by the European Research Council within the grant # N.249543 “Causes and Consequences of Multilevel Governance.”

Further, I would like to thank those people who have inspired me to pursue an academic career in the first place and have actively helped me on the way, most notably my former Professors Gerald Schneider, Susumu Shikano, and Vera Troeger. Obtaining a doctoral degree was not on my agenda when I started studying at the University of Konstanz but the time at Konstanz and Essex has opened my eyes and mind for academic endeavors.

There are many others from whom I have profited in one way or another: the members of the department of political science and public administration at the Vrije Universiteit Amsterdam with its head, Henk Overbeek. I have had the pleasure of teaching comparative politics together with Hans Keman and Barbara Vis and I have learned a lot from observing and collaborating with them. Lunch, dinner, and
conversations with my VU colleagues have made live more pleasant. In particular, I would like to thank my two office mates, Jeanine Bezuijen and Bart Bes as well as Michal Onderco and Falk Ostermann. Jeanine deserves particular credit for helping me with the Dutch summary of my thesis. Further, I had the opportunity to spend a few months as visiting scholar at UNC Chapel Hill and Duke University and to take summer school classes at ICPSR, Ann Arbor, and the Essex Summer School. At these occasions, I took great courses and profited a lot from, amongst others, Fred Boehmke, Jim Johnson, David Soskice, and John Stephens.

My parents, brothers, and extended family have always supported me during my studies and shown interest in my work. Yet, I am glad that life offers much more to be shared than academic studies. I sincerely appreciate all small and large family gatherings, conversations, and good company. Margaret Koornneef-Lughtigheid has provided very kind hospitality in the Netherlands and I am grateful for our Dutch conversations and the glance into Dutch living and culture you have given me. Paul Murdoch helped me to get the best place to stay for my purposes. KLM has safely and—usually—on time carried me between Munich and Amsterdam on countless round trips for almost three years and despite a damaged lock my baggage has largely remained intact. The food in the KLM Crown Lounge at Schiphol Airport has had its ups and downs but was quite nice most of the time.

Elisa brought unknown kinds of joy, happiness, and fatigue to my life and made it quite hard for me to do the weekly commute between Munich and Amsterdam. You learned early on to express your negative feelings towards Papa’s repeated absence due to this strange game called ‘work.’ Later on, you always wanted to join me for work but I fear it was the airplanes that attracted you more than the prospects of quiet thinking, reading, and writing. Katharina made the weeks and months prior to the defense of my thesis turbulent and I sincerely hope that you will become a better sleeper than your elder sister. I am sure you will bring as much joy and energy to our family life. Natascha, you have had to bear a lot as a part-time single-mom with full academic employment and a husband working on a dissertation in a different
country. Co-authoring parts of my dissertation with you has been a pleasure and taught me a lot. You are an excellent co-author and an even better wife. I truly thank you for all you have done over the past years—it would be inappropriate and doomed to failure to try to put this on a scale.
