# Table of Contents

1. **Overview, Results and Discussion**  
   1.1 Introduction  
   1.2 Conventional approaches to the measurement of education level in surveys  
   1.3 Two methods to improve the measurement quality of education variable in the analysis  
   1.4 Underlying theoretical assumptions  
   1.5 Chapter overview  
   1.6 Results  
   1.7 Contentious issues  
   1.8 Limitations and suggestions for further research  
   1.9 Recommendations  

2. **Measuring and Modelling Level of Education in European Societies**  
   2.1 Introduction  
   2.2 The comparative measurement of education level: state of the art  
   2.3 Measuring and modelling level of education in an indirect effects model  
   2.4 Theoretical backgrounds  
   2.5 Data sources and constructed variables  
   2.6 Algorithm and models  
   2.7 Results  
   2.8 Conclusions and discussion  

3. **Measuring and Modelling Level of Education in European Societies Revisited: Exploring the Potential of ISCED-2011**  
   3.1 Introduction  
   3.2 Four approaches to achieve cross-national comparability of education level in survey research  
   3.3 The International Standard Classification of Education [ISCED]  
   3.4 The ESS education measures  
   3.5 Data and method  
   3.6 Results  
   3.7 Conclusions and discussion
