Contents

Summary	13
Nederlandse Samenvatting	16
1. A brief historical overview	21
1.1 A brief historical overview	22
1.2 Climate variability and Seasonality	22
1.3 Planktonic Foraminifera	26
1.3.1 History	27
1.3.2 Distribution	28
1.3.3 What's in the Sediment and what's not?	29
1.3.3.1 Dissolution	29
1.3.3.2 Expatriation	30
1.3.3.3 Bioturbation	31
1.3.4 Species Description	31
1.3.4.1 <i>Globigerina bulloides</i>	31
1.3.4.2 <i>Globigerinoides ruber</i>	31
1.3.4.3 <i>Globorotalia inflata</i>	34
1.3.4.4 <i>Globorotalia truncatulinoides</i>	34
1.3.4.5 <i>Neogloboquadrina dutertrei</i>	35
1.3.4.6 <i>Neogloboquadrina pachyderma</i>	35
1.4 Geochemistry	35
1.4.1 Stable Isotopes	35
1.4.2 Mg/Ca	37
1.5 Aim	37
2. The effect of chemical pre-treatment of sediment upon foraminifera-	
based proxies	41
<i>Published in Geochemistry, Geophysics, Geosystems, 2013, 14(10),</i>	
<i>3996-4014.</i>	
2.1 Rationale	42
2.2 Methodology	43
2.2.1 Core location	43
2.2.2 Planktonic foraminifera	45
2.2.2.1 <i>Globigerinoides ruber</i>	45
2.2.2.2 <i>Globigerina bulloides</i>	45
2.2.2.3 <i>Globorotalia inflata</i>	46
2.2.2.4 <i>Globorotalia menardii</i>	47
2.2.3 Chemical pre-treatment procedure	47
2.2.4 Stable isotope and trace metal geochemical analysis	50
2.3 Results	53
2.3.1 Statistical analysis: t-test	53
2.3.2 Statistical analysis: linear modeling	57

2.4 Discussion	58
2.4.1 Shell weight	61
2.4.2 Stable isotope geochemistry	61
2.5 Conclusions	62
Supplementary material	64
Auxiliary material	65
3. Do stable isotope values of planktonic foraminifera depend on measurement strategy?	73
3.1 Introduction	74
3.2 Material & Methods	76
3.3 Results	80
3.3.1 Variability in $\delta^{18}\text{O}$ data	80
3.3.2 Variability in $\delta^{13}\text{C}$ data	84
3.4 Discussion	84
3.4.1 Crushing and whole specimen isotope analysis versus SSA	85
3.4.1.1 <i>Globigerinoides ruber</i>	85
3.4.1.2 <i>Globigerina bulloides</i>	85
3.4.1.3 <i>Neogloboquadrina dutertrei</i>	86
3.4.2 Implications for Palaeo-studies	86
3.5 Conclusions	87
4. Sensing seasonality in the Arabian Sea: a coupled $\delta^{18}\text{O}$-Mg/Ca approach	89
<i>Accepted for publication as a discussion paper in Climate of the Past Discussions, 2014, 10, 3847-3876.</i>	
4.1 Introduction	90
4.1.1 Study area	91
4.2 Methodology	92
4.2.1 Sample preparation	92
4.2.2 Seasonal and vertical foraminiferal distribution in the Arabian Sea	92
4.2.3 Trace Metals	94
4.2.4 Stable isotope measurements	95
4.3 Results	95
4.3.1 Mg/Ca	95
4.3.2 Oxygen isotopes	98
4.4 Discussion	100
4.4.1 Mg/Ca	100
4.4.2 Oxygen isotopes	101
4.4.3 Comparing Mg/Ca and $\delta^{18}\text{O}$	102
4.5 Conclusions	104
5. Deglaciation changes the North Atlantic seasonality	107
5.1 Methods	114
5.2 Supplementary information	115

6. Oxygen isotope variability of planktonic foraminifera provides clues to past upper ocean seasonal variability	123
6.1 Introduction	124
6.2 Material and methods	124
6.3 Results and Discussion	126
6.3.1 Glacial-Interglacial isotope shifts.	126
6.3.2 Deducing seasonality from single specimens.	128
6.3.3 Meltwater events	128
6.3.4 Freshwater stratification	129
6.3.5 Processes: rates and magnitudes	133
Supplementary Information: <i>The faunal response of planktonic foraminifera</i>	134
S6.1. Species Ecology	134
S6.2. Analytical Methodology.	134
7. Reconstruction the depth of the permanent thermocline through the morphology and geochemistry of the deep dwelling planktonic foraminifer <i>Globorotalia truncatulinoides</i>	139
<i>Accepted for publication in Paleoceanography.</i>	
7.1 Introduction	140
7.2 Methodology.	142
7.3 Results and discussion	148
7.3.1 Bioturbation impact on proxy records	148
7.3.2 The <i>G. truncatulinoides</i> _{dextral} stable isotopes	150
7.3.3 <i>G. truncatulinoides</i> _{dextral} vs. <i>G. truncatulinoides</i> _{sinistral}	152
7.3.4 Palaeoceanographic implications	157
7.4 Conclusion & Outlook.	162
8. Late Pleistocene Glacial-Interglacial related shell size isotope variability in planktonic foraminifera as a function of local hydrology	165
<i>Accepted for publication as a discussion paper in Biogeosciences Discussions, 2014.</i>	
8.1 Introduction	166
8.1.1 Size of planktonic foraminifera	166
8.1.2 Aims and objectives.	168
8.2 Methodology.	169
8.2.1 Calculation of average size and weight	169
8.2.2 Stable isotope geochemistry ($\delta^{18}\text{O}$)	170
8.2.3 Statistical Analysis	170
8.3 Results	181
8.3.1 Faunal abundance counts and Size	181
8.3.2 Oxygen stable isotope values ($\delta^{18}\text{O}$)	181
8.3.3 Carbon stable isotope values ($\delta^{13}\text{C}$).	185
8.3.4 Covariance	189
8.4 Discussion	189
8.4.1 Size-isotope relationship.	189

8.4.2 Size of planktonic foraminifera	193
8.4.3 Depth habitat	194
8.4.4 Seasonality	196
8.4.5 $\Delta\delta^{18}\text{O}$ between species	198
8.4.6 Carbon isotopes	199
8.5 Conclusion	201
Supplementary information.....	202
9. Synthesis and perspectives	213
9.1 Synthesis and perspectives	214
9.2 Pitfalls.....	219
9.3 Perspectives.....	220
References	227
Acknowledgements	269
