Contents

1	INTRODUCTION	1
1.1	A BRIEF DESCRIPTION OF THE SCIENTIFIC BASIS OF CLIMATE CHANGE.	1
1.2	DETECTION AND ATTRIBUTION OF CLIMATE CHANGE THROUGH PHYSICAL CLIMATE MODELS AND STATISTICAL METHODS.....	3
1.3	OBSERVED AND PROJECTED CHANGES IN CLIMATE AND THEIR EFFECTS ON NATURAL AND HUMAN SYSTEMS.	9
1.3.1	<i>Observed changes and impacts during the 20th century.....</i>	<i>10</i>
1.3.2	<i>Projected changes and impacts during the present century and beyond.</i>	<i>15</i>
1.4	THE ECONOMICS OF CLIMATE CHANGE AND INTEGRATED ASSESSMENT MODELS.	22
1.4.1	<i>Climate change from an economic perspective.....</i>	<i>22</i>
1.4.2	<i>Integrated assessment models for climate change.</i>	<i>24</i>
1.5	ABOUT THIS THESIS	26
1.5.1	<i>Research questions</i>	<i>27</i>
1.5.2	<i>Structure.</i>	<i>30</i>
	PART I. ON THE DETECTION AND ATTRIBUTION OF CLIMATE CHANGE..	38
2	DETECTION AND ATTRIBUTION OF CLIMATE CHANGE THROUGH ECONOMETRIC METHODS.....	39
2.1	A BRIEF REVIEW OF TIME SERIES BASED DETECTION AND ATTRIBUTION OF CLIMATE CHANGE.	39
2.1.1	<i>Early studies on the detection and attribution of climate change.</i>	<i>40</i>
2.1.2	<i>Cointegration approach: testing for a common stochastic trend.....</i>	<i>41</i>
2.1.3	<i>Trend stationarity and co-trending: testing for common nonlinear secular trends.</i>	<i>43</i>
2.2	STATIONARY, DIFFERENCE STATIONARY, TREND STATIONARY AND FRACTIONALLY INTEGRATED PROCESSES.	47
2.2.1	<i>Unit roots.....</i>	<i>48</i>
2.2.2	<i>Difference versus trend-stationary models.....</i>	<i>49</i>
2.2.3	<i>Random walk with drift or DS process.....</i>	<i>49</i>
2.2.4	<i>The trend stationary model (TS).....</i>	<i>50</i>
2.2.5	<i>Trend function with breaks.....</i>	<i>50</i>
2.2.6	<i>Fractionally integrated processes.</i>	<i>52</i>

2.2.7	<i>Examples</i>	52
2.3	TESTING FOR A UNIT ROOT.....	54
2.4	UNIT ROOT TESTS THAT ALLOW FOR THE PRESENCE OF STRUCTURAL CHANGES IN THE TREND.....	59
2.4.1	<i>Perron-Yabu testing procedure for structural changes in the trend function.</i>	62
2.4.2	<i>Kim-Perron unit root tests with a one-time break in the trend function</i>	64
2.5	PERRON-ZHU METHODOLOGY FOR ESTIMATING A CONFIDENCE INTERVAL FOR THE BREAK DATE	66
2.6	COINTEGRATION.....	68
2.7	CO-TRENDING.....	73
2.8	CONCLUSIONS	75
3	TIME-SERIES ANALYSIS OF THE 20TH CENTURY CLIMATE SIMULATIONS PRODUCED FOR THE IPCC'S FOURTH ASSESSMENT REPORT	77
3.1	INTRODUCTION	77
3.2	DATA AND METHODOLOGY	80
3.2.1	<i>Data description and source</i>	80
3.2.2	<i>Econometric methodology</i>	84
3.3	RESULTS AND DISCUSSION.....	86
3.3.1	<i>Standard unit root tests</i>	86
3.3.2	<i>Unit root tests allowing for a one-time structural change</i>	86
3.3.3	<i>Attribution of the 20th century warming trend</i>	94
3.4	CONCLUSIONS	97
	APPENDIX A	102
4	STATISTICALLY-DERIVED CONTRIBUTIONS OF DIVERSE HUMAN INFLUENCES TO 20TH CENTURY TEMPERATURE CHANGES	117
4.1	INTRODUCTION	117
4.2	ANALYSIS OF THE OBSERVED WARMING TRENDS IN TEMPERATURES	118
4.3	COMMON TRENDS IN TEMPERATURES AND RADIATIVE FORCING.....	121
4.4	ANTHROPOGENIC INFLUENCE ON THE SLOWDOWNS IN WARMING.....	123
	APPENDIX B	130
	PART II. GLOBAL ECONOMIC IMPACTS OF CLIMATE CHANGE: ANALYZING THE IMPACT FUNCTIONS OF INTEGRATED ASSESSMENT MODELS	175
5	ESTIMATING THE GLOBAL IMPACTS OF CLIMATE VARIABILITY AND CHANGE DURING THE 20TH CENTURY	176
5.1	INTRODUCTION	176
5.2	DATA AND METHODS	178

5.2.1	<i>Climate and radiative forcing databases</i>	178
5.2.2	<i>Statistical methods for the attribution of climate change and temperature scenarios generation</i>	179
5.2.3	<i>Damage functions from IAMs</i>	181
5.3	RESULTS AND DISCUSSION.....	184
5.3.1	<i>Estimates of costs obtained from observed global temperatures</i>	185
5.3.2	<i>Contributions of the natural and anthropogenic radiative forcing to the estimated impacts from the observed global temperatures</i>	188
5.3.3	<i>Estimates of costs obtained from the preindustrial radiative forcing scenario</i> 190	
5.4	THE ANTHROPOGENIC AND NATURAL COMPONENTS OF THE ESTIMATED IMPACTS PER SECTOR.	192
5.5	DISCUSSION AND CONCLUSION	195
APPENDIX C		198
6	TOWARDS IMPACT FUNCTIONS FOR STOCHASTIC CLIMATE CHANGE 203	
6.1	INTRODUCTION	203
6.2	METHODS	204
6.3	EXPECTED IMPACTS OF CLIMATE CHANGE	207
6.4	CERTAINTY-EQUIVALENT IMPACTS OF CLIMATE CHANGE	209
6.5	SCENARIOS	212
6.6	DISCUSSION AND CONCLUSION	215
7	THE PERSISTENCE OF SHOCKS IN GDP AND THE ESTIMATION OF THE POTENTIAL ECONOMIC COSTS OF CLIMATE CHANGE	217
7.1	INTRODUCTION	217
7.2	HOW PERSISTENT ARE SHOCKS IN GDP?.....	220
7.3	PERSISTENCE IN INTEGRATED ASSESSMENT MODELS.....	224
7.3.1	<i>PAGE</i>	224
7.3.2	<i>FUND</i>	225
7.3.3	<i>DICE</i>	225
7.4	SENSITIVITY ANALYSIS OF THE ESTIMATES OF THE ECONOMIC IMPACTS OF CLIMATE CHANGE TO DIFFERENT ASSUMPTIONS REGARDING THE PERSISTENCE OF SHOCKS TO GDP 229	
7.5	ESTIMATES OF THE ECONOMIC IMPACTS OF CLIMATE CHANGE UNDER THE RCP4.5 AND RCP8.5 SCENARIOS AND FOR DIFFERENT VALUES OF A	232
7.6	CONCLUSIONS	235
APPENDIX D		237

8	CLIMATE CHANGE IMPACT FUNCTIONS WITH ADAPTATION AND DYNAMIC SENSITIVITY.....	240
8.1	INTRODUCTION	240
8.2	A GENERALIZATION OF IMPACT FUNCTIONS.....	241
8.3	GENERALIZING THE DICE AND AD-DICE IMPACT FUNCTIONS TO INCLUDE DYNAMIC COPING RANGES AND ADAPTATION.	247
8.3.1	<i>Standard impact functions</i>	248
8.3.2	<i>Generalized impact function</i>	250
8.3.3	<i>Autonomous adaptation</i>	253
8.4	CONCLUSIONS	256
	APPENDIX E.....	258
	PART III. ESTIMATING THE IMPACTS OF CLIMATE CHANGE AT THE REGIONAL/LOCAL SCALES.	263
9	INCREASING ECONOMIC LOSSES FROM HURRICANES RELATED TO GLOBAL WARMING.....	264
9.1	ADJUSTING ECONOMIC LOSSES TO ACCOUNT FOR SOCIETAL CHANGE	265
9.2	RESULTS AND DISCUSSION.....	267
9.3	CONCLUSIONS	271
	APPENDIX F	273
10	A METHODOLOGY FOR THE RISK ASSESSMENT OF CLIMATE VARIABILITY AND CHANGE UNDER UNCERTAINTY. A CASE STUDY: COFFEE PRODUCTION IN VERACRUZ, MEXICO.....	319
10.1	INTRODUCTION	320
10.1.1	<i>Uncertainty in climate scenarios</i>	321
10.1.2	<i>Natural climate variability</i>	325
10.2	METHODOLOGY DESCRIPTION AND SIMULATION PROCEDURES	326
10.3	METHODOLOGY ILLUSTRATION: A CASE STUDY OF COFFEE PRODUCTION IN VERACRUZ, MÉXICO.	329
10.3.1	<i>General information regarding coffee production in Veracruz</i>	330
10.3.2	<i>Simulation model</i>	332
10.3.3	<i>Climate change scenarios for 2050</i>	334
10.4	RESULTS.....	335
10.4.1	<i>Simulation under current climate and economic conditions</i>	335
10.4.2	<i>Dynamic simulations of state coffee production and average net income of the average producer under climate change conditions</i>	339
10.5	CONCLUSIONS	346
11	A CAUTIONARY NOTE ON AUTOMATED STATISTICAL DOWNSCALING METHODS FOR CLIMATE CHANGE	351

11.1	INTRODUCTION	352
11.2	DATA AND METHODOLOGY	354
11.2.1	<i>Datasets and downscaling approach</i>	354
11.2.2	<i>Two contrasting conceptions of statistical modeling and the downscaling of climate change scenarios</i>	355
11.3	RESULTS AND DISCUSSION.....	362
11.3.1	<i>Automated downscaling and misspecification testing</i>	362
11.3.2	<i>Respecification of the statistical models</i>	368
11.4	CONCLUSIONS	370
	APPENDIX G	372
12	A NEW METHODOLOGY FOR BUILDING LOCAL CLIMATE CHANGE SCENARIOS: A CASE STUDY OF MONTHLY TEMPERATURE PROJECTIONS FOR MEXICO CITY	387
12.1	INTRODUCTION	387
12.2	STATISTICAL METHODOLOGY	391
12.2.1	<i>VAR models</i>	391
12.2.2	<i>Restricted forecasts</i>	392
12.3	BUILDING A VAR MODEL FOR MEXICO CITY	394
12.3.1	<i>Description of the place of study</i>	394
12.3.2	<i>Selection of monthly temperature series</i>	396
12.3.3	<i>Preliminary data analysis</i>	397
12.3.4	<i>VAR model building</i>	400
12.4	STATISTICAL DOWNSCALING FOR LOCAL MONTHLY TEMPERATURES IN MEXICO CITY	405
12.4.1	<i>Evaluating predictive performance and generating scenarios for 2020 and 2100</i>	406
12.4.2	<i>Local climate change scenarios for 2020 and 2100 based on restricted forecasts</i>	409
12.4.3	<i>Local climate change scenarios for 2020 and 2100 corrected by changes in local factors</i>	413
12.5	CONCLUSIONS	419
13	THE NEW NATIONAL CLIMATE CHANGE DOCUMENTS OF MEXICO: WHAT DO THE REGIONAL CLIMATE CHANGE SCENARIOS REPRESENT?	421
13.1	INTRODUCTION	421

13.2	DESCRIPTION AND DISCUSSION OF THE PROPOSED STATISTICAL DOWNSCALING METHODOLOGY	423
13.2.1	<i>Data and methods</i>	423
13.2.2	<i>Discussion</i>	425
13.3	TESTING THE PROPOSED DOWNSCALING METHODOLOGY	426
13.3.1	<i>Are the first principal components of the different ECHOG runs correlated? Do they share a warming trend? Can it be assumed that the first principal component necessarily represents the warming trend?</i>	427
13.3.2	<i>A "Perfect Climate Model"</i>	433
13.3.3	<i>The behavior of the slope coefficients of the transfer function when using the observed temperature series and different model runs as explanatory variables</i>	436
13.4	CONCLUSIONS	439
14	REVISITING A FLAWED DOWNSCALING METHODOLOGY	442
14.1	INTRODUCTION	442
14.2	METHODOLOGY	443
14.2.1	<i>Data and methods</i>	443
14.2.2	<i>Principal components</i>	444
14.2.3	<i>Results of the MZN method</i>	449
14.2.4	<i>Illusory justification and validation of MZN</i>	453
14.3	CONCLUSIONS	454
15	THE ECONOMICS OF CLIMATE CHANGE IN MEXICO: IMPLICATIONS FOR NATIONAL/REGIONAL POLICY	460
15.1	INTRODUCTION	460
15.2	A CRITICAL EVALUATION OF THE ECCM SCENARIOS	462
15.2.1	<i>Climate change scenarios (2008-2100)</i>	463
15.2.2	<i>GDP scenarios (2008-2100)</i>	464
15.3	A CRITICAL EVALUATION OF THE FINDINGS IN THE ECCM REPORT	466
15.3.1	<i>Consistency of ECCM results with other studies</i>	466
15.3.2	<i>ECCM cost estimates across different sectors</i>	469
15.3.3	<i>ECCM climate change impact vs. mitigation costs</i>	472
15.3.4	<i>Further reasons for concern: Building of a regional view of the economics of climate change</i>	472
15.4	CONCLUSIONS	474
16.	CONCLUSIONS AND FUTURE RESEARCH	476
16.1	RESEARCH CONCLUSIONS	476

16.1.1	<i>The detection and attribution of climate change.....</i>	476
16.1.2	<i>The global economic impacts of climate change.....</i>	479
16.1.3	<i>The impacts of climate change at the regional/local scales.....</i>	482
16.1.4	<i>Evaluating the robustness of the science behind national climate change documents.....</i>	485
16.2	IMPLICATIONS FOR POLICY MAKING.....	486
16.3	FUTURE RESEARCH	487
	REFERENCES	491
	SUMMARY.....	526
	SAMENVATTING.....	528
	CURRICULUM VITAE	530
