CONTENTS

CHAPTER 1: General introduction 7

CHAPTER 2: Biomechanics of bone cells 15

CHAPTER 3: Serum of patients with active rheumatoid arthritis inhibits differentiation of osteochondrogenic precursor cells 35

CHAPTER 4: Inflammatory factors in the circulation of patients with active rheumatoid arthritis stimulate osteoclastogenesis via endogenous cytokine production by osteoblasts 57

CHAPTER 5: CXCL8 and CCL20 enhance osteoclastogenesis via modulation of cytokine production by human primary osteoblasts 79

CHAPTER 6: Mechanical loading reduces inflammation-induced human osteocyte-to-osteoclast communication 103

CHAPTER 7: Inflammatory cytokines affect the production of osteocyte-related signaling molecules by human bone cells cultured in close contact with their native matrix 121

CHAPTER 8: General discussion 141
